VOLUME 112

The background of the page is a photograph of a pond. In the foreground, the water is dark with ripples. In the middle ground, there is a grassy area and a white building with a dark roof. In the background, there are several trees, including a large palm tree on the left and a tall, thin tree on the right. The overall scene is peaceful and somewhat nostalgic.

College Decoded

Three years ago we had much to say
without the words to say much at all.

Our pasts were tied loosely
to our wrists while we sat
glancing at one another, waiting for someone
or something to come and untie the knots.

Soon devoured by the rivers of opportunity
and the moments born from them
we became dissident to all idle things.

We asked nothing of the world
but to dip us in passion
in fluxed and unfiltered ways:
to decode us as it would a heartbeat.

From the shouts of Leavey to the
clacking plates in Benson
and the nightly crawl on Bellomy Street
there is a song we've learned to sing,
melodic as the patter of a Bronco's hoofbeats
even as it runs away from you.

Now, as we suddenly stare down our futures,
we ponder. Our yesterdays have this way of making themselves
brighter when they dance in the today. How good was it?
If it's tomorrow we fear, let's dive in as quickly
as we came together, then inched apart:
like the contraction and release in your lungs
the moment you tasted the sweetest breath you ever took.

-Jake Lans '16

SOB CORN GO

A LETTER FROM THE ASG PRESIDENT & VICE PRESIDENT

For those of you that like to decode puzzles, you'll find the above phrase anagramizes into a familiar phrase we love to say (hint: it rhymes with Shmo Shmoncos).

One of our favorite Jesuit values is discernment, understanding what is important for you. Practicing discernment forms your code, or your judgement determining what is worth your time. As you page through another fantastic volume of the Redwood, we hope you will take some time to reflect on the code you have built over the last two decades of your life. We have learned lessons, made friends and found a home, all three that will last long after we leave this university, all part of our code.

While there are many great codes in the world: JavaScript, Pirate's, DaVinci's; we hope you will carry the huge successes, the overcome challenges, and the Go Broncos memories with you into your future around the country. Don't forget too, you are forever part of Santa Clara's code. Our school is forever changed for the better because each of you were here.

Thank you for a fantastic four years here at Santa Clara,

As always,

Go Broncos,

Aaron Poor and Madeline Owen

[ATHLETICS]

■ Daniel Webber

Persistence and skill combine with pools of sweat as Bronco athletes compete fiercely in their given sports. Being a collegiate athlete teaches each individual the meaning of teamwork and hard work on a deeper level than they've encountered before. They spend their time on our campus fully dedicated to their game, whether that's in the pool, on the field or at the range.

BELOW THE SURFACE

DESPITE THE EASE AND FLUIDITY OF THE GAME TO VIEWERS, THE MENS' WATER POLO TEAM PUT IN MAJOR EFFORT BEHIND THE SCENES.

For a sport where you can only see the players from the waist up in the seeming softness of water, water polo garners a surprising amount of ferocity.

"Water polo is a violent sport. Broken noses, dislocated shoulders, broken fingers, concussions, scratches that rip open skin, all of which are very common injuries in the sport of water polo. It's all legal too. Anything that a referee cannot see under the water is fair game," goalkeeper **Joe Maestri '16** said. "A player is designated to fight or injure the opposing team members. Water polo is very strategic and vicious."

Players must develop a conglomeration of aggressive competition under the water and underlying grace above the water in order to get the ball across the pool and into the opponent's net – all without touching the pool's floor.

"Nowadays, I spend most of my time in the water. So, treading water comes more natural to me than walking or running," Maestri said.

It is a combination of treading water and lifting themselves high enough to go through a play, while also having a mental flexibility to mind the clock and call out the plays required a great amount of focus.

That level of endurance does not come easy.

"You're swimming the whole time – you can't touch the bottom of the pool," goalkeeper **Emil Huebner '18** said.

With so much to physically and mentally manage, it's a wonder the players managed to stay afloat. Injuries and physicality aside, the team makes it seem effortless.

IT'S ALL IN YOUR HEAD

FOR THE TEAM, RUNNING IS
MORE MENTAL THAN PHYSICAL.

Aside from running over 50 miles a week, cross country runners have to keep a level head while training and competing. One role of the captains is to keep everyone thinking positively to make sure they are running their best.

"Mentally you have to be all there, guys can easily lose their minds, not really, but in a sense can get down on themselves from a string of bad workouts or from not feeling good," Joey Berriatua '17 said.

"Mostly I just tell myself to stay tough, you know it's kind of scary going into a race because it's going hurt really bad," Mary Kriege '16 said. "You know you haven't done your best if it didn't hurt really bad."

Keeping everyone with high spirits and not getting down among the team is an important part to running their best. This year the men's team has ten freshmen, allowing for them to train together and get faster together.

"We are all really good friends. It's a motivating factor, and we have talked about goals of what we could become, and one thing people say is 'freshmen class ready to make history,'" John O'Hagan '19 said.

This potential that the freshmen have is the motivating factor for Captain Joey Berriatua to red shirt the following season.

"I'm just getting ready for two years from now when I can run with those guys who will be juniors. As long as they keep running in a pack and staying together they are going to be really fast and we are going to be turning heads for sure," Berriatua said.

The incoming freshmen became not only teammates, but also good friends. Keeping level heads, the teams achieved their goals, and the freshmen class is ready to make history.

MEN'S SOCCER STRIKES BACK: #GOALS

THE MEN'S SOCCER TEAM
BROUGHT THE HEAT TO KEEP
IMPROVING THEIR GAME.

"Discipline" and "balance" are two words that describe what the men's soccer team is all about.

"It takes a lot of hard work and dedication to go to early morning conditioning and put in all necessary efforts to make the game as fluid as possible," said teammates Kendall McIntosh '16 and Jonathan Jarrett '19.

Keeping the discipline was especially important for Jarrett who sustained a calf injury in the last month of the season.

"Beating Cal was the best moment so far because we were ranked that week and they were already ranked, so it was really good beating a ranked team and moving up," Jarrett said. "This game is worth it and I will work my way back because I love soccer."

His dedication to the sport resonates with each teammate as they strive to improve individually and in turn improve the team.

"I have grown in my willingness to take on additional responsibilities and we have grown in our ability to execute these responsibilities," McIntosh said.

As the team went into the WCC Men's Soccer Championship, seniors had their last game on home turf. It was a great final game for the five seniors.

"I am honored to have been a part of it for four years," McIntosh said.

KICKING IT

WOMEN'S SOCCER REACHES UNPRECEDENTED HEIGHTS

One way a school can quickly gain national acclaim is through its sports programs. With the Women's Soccer team having staked a claim in the 16 team NCAA playoffs, the team has rebounded from last year's heartbreaking exclusion from the tournament and brought a level of prominence and expectation that usually accompanies an athletic powerhouse.

The success of the U.S. Women's National Soccer Team, who won the 2015 World Cup, brought pride to SCU especially since alumna Julie Johnston '14 played an immense role in their success.

"One of the reasons the women's team has been, and continues to be, a prominent program is the great coaching staff that is here. The environment that is present here is both challenging and supportive," Midfielder **Julie Vass '17** said.

"We have an incredible team culture that is reinforced and lived out by an incredible, dedicated coaching staff and passionate, committed players," Defender **Katherine Uhl '18** said. We have core values that we strive to live up to each time we step onto the field and represent our university."

While every win was significant toward their overall success, there was one in particular that stood out for players and supportive spectators alike: a win against renowned Stanford.

"I can speak on behalf of the entire program when I say that the defining moment of the season was the win against Stanford on Welcome Weekend," goalkeeper **Andi Tostanosk '16** said. "As a senior, I have played Stanford five times, and before this year we had not beaten Stanford in nine years. It was in that winning moment that our team realized our true potential."

SERVING WITH SUPERSTITIONS

SPORTS TEAMS ATTRIBUTE THEIR VICTORIES
TO HARD WORK AND CONSISTENT PRACTICE,
BUT SOME PLAYERS FEEL THAT THERE IS
MORE TO IT THAN THAT.

Last year the Women's Volleyball team was able to beat Brigham Young University and University of San Diego, two of the highest ranked teams in the nation, which served as a source of pride.

"It was awesome beating them on our home court," **Danielle Rottman '16** said.

With matches against these big rivals approaching, the team stepped up their efforts to beat them again. Extensive practices, which were held four days a week and changed everyday, prepared them to take on these foes.

"Practices focus on whatever the coaches feel we need to work on from the previous game which helps us to continually improve," **Lacey Maas '16** said.

Both Rottman and Maas have been playing volleyball for nearly a decade but still feel that certain superstitions they have could have an effect on the game at hand.

"I have to put on my ankle braces and shoes in a certain order," said Maas.

Maas also tries to look at the score as little as possible, and if she does happen to glance at it, she needs to look at it three times.

One of the more important superstitions occurs in the locker room right before a match starts. After the traditional pep talk given by the coaches, players bring out a bluetooth speaker and begin to blast music in a ritual that embodies how close the members of the team have come over the years.

"We have a wide range of music, anything from seventies to today's hits, Justin Bieber has definitely been a popular one and Beyoncé's a big one, 'Love on Top' has been like a team anthem," Rottman said.

For the players, it is invigorating to be able to build up their energy, whether they are singing along or dancing to the beat.

"When we're blaring old school music or hip hop or rap music from when I was in sixth grade, I get all pumped up and that's how I want to feel before a game," Maas said.

A PIECE OF THE PIE

Observing the demeanor of the Ultimate Frisbee teams, you would never know the amount of intensity that goes into the game. The more the sport has become a college phenomenon, the more dedicated the players have become.

"In terms of the general sport, I think that it's gained a lot of recognition over the past few years. Now it's more than just a bunch of people throwing a disc around, and people get that it's a real, competitive sport," **Leigh Pond '17** said.

This isn't to say that it's a sport solely for the highly skilled. Part of the appeal is its pick-up-ability, meaning that a person can go into it knowing nothing and foster their skills with the help of the more senior team members.

"Athletically, I think, it's just a willingness to try. My first year playing at SCU I was terrible. I didn't make the A team – I wasn't even close. Just the fact that I was going out and just trying to

get good at it, I got hooked, and the athleticism started to make sense," **Sean Donovan '16** said.

"It's a big learning curve," Pond said, "You get what you put into it. You'll have some people who go in and aren't afraid to get aggressive, but you'll have others who are more lacksadaisy and will drop a disc and just go 'That's okay, I'll pick it up next time.'"

With such a range of commitment levels, Ultimate served as a large draw for college students strapped down with schoolwork but wanting a release to get out that extra energy. Of course, for the higher-level players this meant getting their head in the game to the fullest extent.

"I've been in several situations where I almost get in a fight with people on the field. People are yelling at each other, and then afterwards the

game's over, and you're all friends again. That's just how it works. You bring the intensity to the game, but afterward everyone's just trying to have fun," **Keegan Campbell '16** said.

In this way the Ultimate Frisbee team generated a delicate balance of intensity and camaraderie.

Campbell drove home his point, turning to Donovan on his crutches and asking, "Will you give me a piggyback ride?"

MORE THAN A TEAM

STUDENTS SHOW LEADERSHIP ON THE INTRAMURAL FIELD.

On a windy Sunday night “Marky Mark and the Funky Bunch” head over to Bellomy Field for their game against another intramural team, “State”. The team captain of the Funky Bunch, **Guy Malcolm '19** played varsity football in high school and started the intramural team to find people in his dorm with an interest in football.

As team captain, it is Malcolm's responsibility to “attend to every one's needs and to use their skills to win the game,” he said. “But really, I just make sure that everyone is having a good time.”

On Monday nights, the “Flying Broncos” meet for a badminton match along with their team captain Ketan Rajput, an international graduate student from Mumbai, India.

“Badminton is a tough sport to play. It is the fastest racquet sport, and you need to have quick reflexes,” Rajput said. “It has taught me to focus on any task and to work hard on getting it done. It's the same as thinking and acting on ways to solve a problem we have in our lives.”

To Rajput, badminton brings together people from his culture as well as people from many other walks of life.

“Badminton is a well known sport in my country, and India has produced some top ranking badminton players. For some it is also a way to meet and interact with new people and have a fun sport to play,” Rajput said.

Intramurals are a fantastic form of organized sport where students who would typically shy away from intensive and time consuming sports can play in their free time and can still build the friendships that form on many other teams.

FRANKIE SAYS RE-LAX...

BEHIND THE LACROSSE TEAMS'
CHILL EXTERIOR LIES A FIERCE
COMPETITIVE SPIRIT.

Over the years, the lacrosse program has undergone quite the transformation. Both the women's and men's teams received new coaches within the past couple of seasons. Despite the change in leadership, both teams have embraced the ramped up competition and techniques that came with the new team.

"It's amazing to see the transformation of the program, because we really weren't anything until last year. We're a pretty loose group of guys, so before the games it's nice that everyone's not uptight. We're playing for something; we're playing to win," Nick Goss '17, men's lacrosse vice president, said.

That go-hard attitude was a theme in both teams, proving that club sports teams have just as much dedication as the big leagues.

"It's not like we're on scholarship to play lacrosse, we're not a D1 team. We're in lacrosse because we're passionate about the sport, we like being a part of a team," Abby Lewis '16, women's co-captain, said.

The passion she mentions is evident in every game. With each interaction between the players, you can see their methods of open communication, enthusiasm and support for one another, win or lose.

"We have to play not only for ourselves, but for each other, because one of the big things about our team is we play Bronco lacrosse. We want everyone to be involved. We always say we have a deep bench – we don't just rely on one player to make all the plays, score all the goals, make all the saves," Alexa Robinson '16, co-captain, said.

In spite of what could have been a rough transition between coaches, both the men's and women's teams managed to maintain a balance between traditions and new techniques. In the end, each team's adaptability and drive to take their game to the next level allowed for them to really embody the Go Broncos spirit.

PLAYING TO THE BEAT

MUSIC HELPS THE MEN'S BASKETBALL TEAM.

The men's locker room is the place to be before and after a game. Before a game the boys get pumped and prepare for the upcoming game. After the game the boys play music to celebrate their win or cheer up after a loss.

When asked what he does to get excited before a game **Nathaniel Kratch '17** said, "listening to music with my teammates in the locker room."

The game takes the players around the country. Sometimes the players get to return to their hometowns and play against the schools they grew up with.

"Going home to Portland, just to see family and friends, was fun. It happened to be on my birthday too so that was pretty cool," **Werner Nistler '16** said. "We won so that made it a good trip."

Another favorite memory for the players was their game against the University of Arizona.

"The Arizona game was big for us because no one really expected us to be that close. We pushed into overtime and probably should have won that game, but it was on national TV so it showed a lot of people what we can do," **Matt Hubbard '18** said.

PUTTING IN THE HOURS

LONG HOURS ON THE COURT
HELP THE PLAYERS IN MORE
THAN JUST BASKETBALL.

The silence of the Leavey Center is broken by the squeaking of shoes and its polished, gleaming floors can barely be seen when the Women's Basketball team dominate the court and their opponents. Their record this season did not come easy, it came with a price of long and numerous practices.

"My life revolves around basketball," forward **Marie Bertholdt '17** said.

Bertholdt and the rest of the basketball team practice four to five hours a day, six times a week. These hours spent preparing for games do not include the extended amount of traveling the team does for away games, which can span nearly a week.

Despite having such a demanding schedule, the members of the team highly value the lessons they have learned and cherish the time spent together.

"Though it may seem we as athletes have a lot on our shoulders, there is nothing we can't endure with the help and motivation of the team," **Devin Hudson '16** said.

With 13 members on the team, in addition to coaches and trainers, players have the benefit of a family on campus.

"This helps you in all areas of life because you know you have a support system no matter what," Bertholdt said.

Not only does being in a group that meets as often as the basketball team benefit the players in their current endeavors but it has been preparing them for life beyond the court.

"Playing basketball has taught me how to be someone who willingly serves others with the intent of inspiring each individual to be the best they can," Hudson, who is pursuing a degree in educational leadership, said.

"Basketball is definitely preparing me for something tougher in the future," **Morgan McGwire '18** said.

Time management is a requirement for being on an athletic team, one that is learned overtime and is immensely valuable for the future. Total dedication to accomplishing a common goal helps when working in a group of people.

"Being dedicated and putting in effort has gotten me far and I will continue to use this in my life moving forward," said Bertholdt.

STRIVING FOR GREEN JACKETS

MEN'S GOLF MAKES SWINGS TOWARD THE FUTURE

Big changes were in store for the golf program starting this year. Renee Baumgartner was appointed the new Athletic Director. Baumgartner's has a deep background in sports, specifically golf.

"I see great potential with the players that are coming in and the growth of the athletics in the school in general, I think that one of major key changes would be the help of the new athletic director, she has a lot of experience in golf, herself a national champion in golf, while coaching and playing. I really think she is going to have a positive impact on the golf program," **Carlos Briones '16** said.

Because campus lacks a golf course, the players have to take a significant amount of time to practice off campus.

"My latest class is at 11:30am and then we have to be at the van at noon every day and then we get back to campus at eight every night, so I don't think people realize that because most teams are on campus, but we have to travel so much, it makes it hard, but it makes it very structured," said **Evan McLeod '17**.

"During the season I get into this mood where I am never messing around, always working hard. I feel like that is a good skill I have developed, I remember during my freshman year when we had the first week of off season and I didn't know what to do myself," said **Tyler Kertson '17**.

With the season already done, the team has made significant progress, but still wants to move up higher in national ranking.

"Its better to play teams with better fields and if you do really well in tough competition compared to decent completion you are going to shoot up the ranking. We are hoping to be at the top fifty percent, right now are ninety out of three hundred, but you got to be top seventy to make the post-season and I think moving up those twenty spots is something very achievable," Kertson said.

The golf team has a bright future ahead of them, especially

BUILDING FOR SUCCESS

THE WOMEN'S WATER POLO TEAM BOUNCES BACK AFTER A ROCKY START.

While their season began with a rocky start, the lady Broncos are not discouraged. These girls continually worked hard in practice, and sometimes their efforts did not always translate to their games.

Even at the beginning of their season, Goalkeeper **Francesca Puccinelli '17** was able to ascertain the value that everyone brought to the team when she said, "So far, our team has so much talent. We are beginning to utilize and build that talent together in our games."

With four new first-years on the team, there can be an adjustment period of learning how to work together.

But when it comes down to game time, "we all tend to focus in, pretty quickly," Driver **Erin Sheridan '16** said.

At the peak of their game, these girls learned to coordinate their plays with one another and work together well.

"As a goalie, every scored shot can be considered as 'something that didn't go my way.' However, I have learned through many years of being a goalie that adjustment is key to stopping the next similar shot," Puccinelli said.

Their bond as a team is strong both in and out of the pool. Sheridan described the team as a "funny, sarcastic family."

Even while practicing such a physically demanding sport as water polo, the women's team enjoyed taking time and share small moments with each other.

"We had the most beautiful sunset during practice. We were playing against a backdrop that was so phenomenal it looked like a painting. Our team really cherishes sunsets," Utility **Elizabeth Anderson '16** said.

BLOWING US AWAY WITH THEIR SKILLS

THE WOMEN'S GOLF TEAM SWINGS FOR THE SKIES

Starting off the spring season in Simi Valley facing over twenty mile per hour winds, the Women's golf team is no stranger to crazy weather conditions. Golf is a game that is very weather dependent. If the wind blows at just the wrong time, a perfectly set up shot can go astray. Rain is also difficult to play in because it skews the direction that the ball will travel. Since golf is primarily a mental game and an individual sport, it is important to keep a calm head and have a positive attitude despite the weather.

"I think I play the best when I'm relaxed and having a good time. That's something that I can control: how I react to something I can't control. Our coach is very heavily about being able to control what you can, and then dealing with what you can't control," said **Annie Freman '16**.

A collegiate golf team offers more than just a higher level of play; it brings together people of different personalities who offer support and bond over their mutual love and frustrations of golf.

Kyleigh Moreno '18 smiled as she remarked, "We always go to tournaments, and I look at them and think 'I am so blessed to be put on a team with this group of girls' It feels like I fit in so well."

Knowing that your teammates are going through the same course is comforting, especially when you start to feel frustrated and get inside your head.

"We try to make a big deal about if we see each other on the course to wave and say 'hi'. If you see if someone's playing well, it's a motivating factor," said **Monique Riley '16**.

EARLY BIRDS CATCH WORMS

EARLY MORNING PRACTICES
CAN'T KEEP THESE GUYS FROM
DOING WHAT THEY LOVE.

Early mornings and long practices might deter some people from playing tennis but they didn't stop the men's tennis team here. Practices started as early as 6:30am, but the players still showed up to play the sport they loved.

"Waking up early [is the worst part]. Now most of the days during the week we have 7:00am fitness. Last quarter we had 6:00am fitness so I had to wake up at 5:30am. So it depends, it varies but usually it's early," **Ashot Khacharyan '16** said. Being able to see his teammates and play the sport he loved made up for the early mornings, however.

The creativity and competitiveness of the sport boosted their motivation for the early mornings.

"I'm really competitive and it plays into my competitive nature and it's just a really creative sport. You can create whatever shot you want and it's really fun. It's a tactful sport," **Robert Seby '19** said.

This creativity especially came out when they played. Playing singles or doubles is not a choice.

"I prefer doubles when I'm tired because you don't have to move as much. But if I had to choose one I'd play singles. It all depend on you and it's more personal of a game than doubles," Khacharyan said.

After playing such a mental game the boys needed a break in order to regain their strength and motivation.

"Tennis is a sport that demands a lot of mental and physical strength and endurance. So it is great to have fun with your teammates, because it also helps physically and mentally recharge your batteries," **Sebastian Mathieu '18** said.

No matter what motivated them or helped them recover after playing such a mental game, the team was always there for each other and supported each other through both the early mornings and the loses.

RETURN TO THE SWING OF THINGS

EXPERIENCED MEMBERS OF THE WOMEN'S TENNIS TEAM HELP NEW ONES ADJUST.

Classes during the day, studying in the evening and spending time with friends is what all students at Santa Clara have to manage, but there is a select few who add one more activity to the mix: athletes. The members of the Women's Tennis team are able to handle all these aspects of their lives and remain committed to performing their best at matches.

Giannina Ong '17 had taken a break from playing tennis when she began playing again and felt that she wanted to start again.

"I am glad that I am able to play for the team now because I realized how much I miss playing tennis," Ong said.

With practice nearly everyday for over two hours, Ong's schedule, which consists of double majoring in Classics and English, being

an editor for the Santa Clara Review and a part of the Retail Studies Student Association Board, has become even more tight.

"Although my schedule is quite full, I don't mind giving an hour or two to something I believe in," Ong said.

Luckily, Ong has received helpful advice from women who have experience managing being on team with other aspects of their lives.

"I pride myself on being very organized and have developed the ability to multi-task," **Chelby Cooke '16** said.

Prioritizing has been her key to organizing her time. Some players even enjoy the constraint tennis puts on their schedule.

■ Ketan Rajput
Nabila Farah '17 has eyes on
the ball as she takes a shot.

"When we are off from tennis, it is even harder for me to stay on track with everything," **Nabila Farah Franco '17** said, having mastered efficiency in her studies and practice.

Players are still able to save time for their own hobbies and interests.

"I really enjoy music, and I love dancing," Farah Franco said.

Cooke has been able to express her creativity through her passion for clothes and style.

"They're a really enjoyable outlet for me to express my creative and artistic side," Cooke said.

Ong has been grateful for the opportunity to play for the tennis team no matter what and hopes to make a difference in the Santa Clara community.

"Every day I walk on the court reminding myself how lucky I am to be able to do something I love to do, and I am so grateful that SCU makes that possible for me," Ong said.

DESIGNER & COPYWRITER: Robert Schulte

A GAME OF SCRUMS AND TURF BURNS

CLUB RUGBY TEAMS STRIVE FOR NCAA STATUS.

Don't let the name club fool you, Rugby is taken just as seriously as other sports on campus. Both the men's and women's team strive to bring their "A" game to the field and take home as many wins as possible. The men's team even has a development team for newer players.

"I am on B-Side and the A-side always plays first and that's the game that counts and the B-side will come in. It's basically for development and to get those new to the game and who are still learning the game," **Peter Koros '19** said.

This season the women's and men's teams were off to a good start with high chances that both would play in playoffs.

"Last year we were five and three which was fairly good, but then they split the division in half. Instead of playing seven or eight teams one or two times, we play two teams twice and they are right at our level or just a little better than us. We really have to work for our games," **Erika Sweet '18** said.

"We are doing well this year, currently 19th in the nation, we are going down to play CalPoly and they are seventh right now, so if we were to beat them we are going to get a large bump," **Riley White '16** said.

Contrary to belief, rugby is not a new sport at Santa Clara. In 1916, Santa Clara went undefeated (10-0) and outscored their opponents 310-13. That same year Stanford went undefeated too, which led to the "big game." Historically, this is one of the reasons Stanford is our big rival.

"Santa Clara, Stanford and Cal were the class of college rugby teams for a long time in the US and in the 1924 Olympic games, the US won gold for rugby and three or four players on the team were Santa Clara students," White said.

Looking towards the future the teams strive to become a NCAA sport, instead of club.

"That is where we want to get to, even in our competition we play against other club teams, but we also play a handful that are varsity status, so that is where rugby is at nationally, we try and act as a varsity sport as much as we can. We practice four days a week and down the road we will be able to gain NCAA status," said White.

MAKING WAVES

HARD WORK AND FUN TRADITIONS COMBINE TO MAKE A SEASON.

While many students have participated in their chosen sport years before they decide on a college, a lot of crew members are just testing out the waters when they join the team.

"Rowing is unique since a lot of people start here, we have a novice class which is a race specifically for first-years, and we really support that novice boat," **Christopher Doyle '16** said.

"It's very possible to walk onto the team and make it to the varsity boat by the end of the year. It's really self-motivating," Coxswain **Maddie Angevine '18** said.

"That feeling of being first in a race and the adrenaline that came with it is something that stayed with me. It's the moment of clarity where I realized this is why I'm doing this sport and this is what it really feels like to win," Coxswain **Drew Del Toro '17** said.

"Ten months of hard work is put into eight minutes, and the moment you cross the finish line, it's like this overwhelming feeling of accomplishment, yet also bittersweet because it's over. Then you look around and see your teammates who have put in just the same amount of work as you and that's really motivating and fulfilling for me," Captain **Molly Walker '16** said.

Aside from attending intense practices to prepare for their season, the teams also have their own fun traditions that add interesting interactions between the men and women's teams. There are boat blessings, tank trading and the women's Black Velvet event. All of which has culminated in a tight-knit group of rowers.

"Trading tanks is a way to meet the people who you've raced against, either you beat, or who beat you. You go up as a boat to the other team and find the person who sits in the same seat as you and you get to chat and share your experiences," Del Toro said.

"Black Velvet is a kickoff to our season and signifies the ice breaking from the winter. During the beginning events, it's a really cool way to reflect on all the work we've done in the fall and winter and just prepare for the spring," Walker said.

One tradition that has brought the two teams together was the Stanford Oar.

"One team is in possession of the oar, and there were certain rules and restrictions on where the oar can be stored, like it couldn't be hidden or out of sight and it cannot be behind locked doors. It's like an extended game of capture the flag," Del Toro said.

In the most recent play of the Stanford Oar, the women's team managed to haul off with it, and to this day the current whereabouts of the Oar is unknown.

PITCHING IN THE COMMUNITY

THE BASEBALL TEAM REACHES
OUT TO GIVE A HELPING HAND.

Balancing academics and sports can be hard, but the baseball team manages to do just that. Between practice and road trips, to be a student athlete takes a lot of commitment, sacrifice and time management.

"As a student athlete, the biggest challenge is balancing school with your sport. You want to get good grades but you also want to perform well on the field. The more time you put into practicing for baseball, the better results you usually get. And the same for school. Being that baseball takes up so much of your day, it is similar to working a job," Jason Seever '17 said.

In addition to balancing academics and sports, the team is also a very active group in the Santa Clara community.

"We have served dinner to those that are less fortunate, helped kids get active at recess at the elementary school down the street. As a team, we do a lot of team dinners as well as spending all day together whether it is at the field, on campus or just at our apartments just hanging out around each other. We're always together," Braden Frankfort '18 said.

"In the past we visited patients at the Stanford hospital and raised money for cancer awareness," Seever said.

Many of the players have been playing and following America's favorite pastime their entire lives. Baseball provides a unique bonding experience through camaraderie.

"I like how you get to play in front of other people-your parents, friends and fans. Making your family proud is another satisfying part of the game. I heard women like baseball players too so that's always a good thing," Seever said.

ON THE BALL

NOTHING'S SOFT ABOUT SOFTBALL.

The softball team is practically inseparable, whether they are in practice or off the field. Since entering college can be an unnerving experience, having an immediate group of friends can really just get the ball rolling for first-years. Many new team members often become fast friends even before they step onto campus as an official student.

"We do a lot of things together, we spend a lot of time together, we definitely have a strong team dynamic," **Amanda Delfino '17** said.

"We were in contact with new students the whole time over the summer, so it's really neat seeing new members find their niche not only in the

team dynamic, but also on the field their role is defined almost instantly when they start," **Micaela Viera '18** said.

Having a really connected team not only helps the new players feel welcome, it bolsters their teamwork, helping the girls achieve a great win against Idaho State.

"We were down 7-1 and in the end of the game we made a really big comeback and ended up winning 13-7, it was fun, everyone did their part, and it really showed that we can come back from things like that," Delfino said.

■ Neil Brorsen
The infield team
strategizes at the mound.

"Before games, each of us has our own little thing that we like to do. For example, mine is to write inspirational things on my arm in German. It is a refocusing tool that I use," **Jordan Dawkins '19** said.

Teamwork like this can also give rise to interesting tactics. Left handed batters (slappers) usually have an advantage on the field since they can get a running start, so by combining their efforts, the girls can even out the field.

"It's great to just take down their advantage at being a slapper and do anything we can to get them out so the other team loses their advantage," **Morgan Modesto '19** said.

"Last year we had a great culture, and this year it was great to see that the culture is being cultivated further," Vierra said.

Near the end of the year, the seniors get to run practice for a day and plan a fun activity for the rest of the team.

[ACTIVITIES]

■ *Claire McBride*

Broncos have no trouble finding an outlet for their interests, passion and creativity. Using contributed student time, nine Chartered Student Organizations and a multitude of Registered Student Organizations are made possible. These organizations help keep the campus busy, day or night, and allow individuals the opportunities to hone their skills and leadership.

UNDERGROUND SOUND

EXPLORING AND EXPANDING THE COMMUNITY OF KSCU

KSCU, "The Underground Sound," is not so underground and hidden. KSCU provides an open, welcoming environment where music enthusiasts can express themselves and share their music with others. Aside from music, students can also host their own talk shows, podcasts and comedic sketches.

"I really like listening to the talk shows and hearing what students have to say. It makes me appreciate radio more as a means of communication," Promotions Director **Imani Thompson '18** said.

In particular, a talk show comedian named Jimmy Flynn has found his niche at KSCU.

"My favorite show right now is Jimmy Flynn who is a sophomore comedian. His show is called 'Amateur Hour' and is every Thursday night. He's hilarious," General Manager **Ben Paulson '17** said.

It is really the staff and the community at KSCU that makes it so warm and engaging to be a part of.

"I love the community that we have created within the organization. I think that most people on campus feel like if they wanted to get involved, they could," Paulson said.

"I like that Santa Clara has a little community around music," Music Director **Chloe Holland '16** said.

During KSCU's weekly meetings, volunteer DJs and staff members drop by the office, listen to music and hang out.

"I really like the fact that KSCU made a point to show that a lot of stuff is geared towards people who don't have any experience. You don't have to be someone who knows every single band and every single song of those specific bands. It is open to everyone," Thompson said.

Radio is becoming a dying medium. Online streaming services, such as Amazon Prime Music, Spotify and Apple Music have arisen out of the slow decline of AM/FM radio. With those streaming services, one can listen to any song at the click of a button.

"In this digital day and age, radio is starting to be forgotten. Radio, in the form of broadcasting such as TV or news, it is important for us, students, to have an outlet and to get our voices heard," Thompson said, "[Our radio is] not just broadcasted to SCU. Our broadcast spans as far north as Fremont and as far south as Gilroy."

The scope of KSCU's audience makes the radio station a staple in not only SCU's community but the greater Bay Area as well.

"I feel like a lot of times it's confusing who the audience is. You're just in a box over there with a microphone. You don't really know who's listening. [KSCU] really broadcasts to the greater San Jose area," Holland said.

BINDING THE SCHOOL TOGETHER

THE REDWOOD CONNECTS
PEOPLE ACROSS THE CAMPUS.

SCU is well-known for keeping its students busy with a wide and diverse range of activities and people. At first glance, not all of the activities on campus can relate to each other, but The Redwood Yearbook finds the intricate connections. The yearbook is created from different elements of writing, design and photography, and is also able to pull together its content to create a cohesive memory.

"There's a certain sentimentality that comes with the yearbook and captures that bittersweet feeling at the end of every school year," **Vivian Stoneking '17** said.

This year, designers were given more creative freedom in their designs to make the theme come to life.

"By having more of a creative role in the position, we changed the way designers worked with the staff and how they're able to show that," Design Editor **Ciaran Freeman '18** said.

Through working on The Redwood, the staff itself becomes part of the connecting force that the yearbook holds through interacting with people.

"You meet people from all walks of campus, it exposes you to so much and really brings you out of your comfort zone," Editor-in-Chief **Ashley Nguyen '16** said.

Interviewees, current and old staff members become long-term friends, adding to the sentimentality of the yearbook. The students are immortalized in print and at the same time they forge bonds that will last for years.

"To me it's about the people you meet and the people you work with. By forming bonds it feels more rewarding," Nguyen said.

RESIDENTIAL LEARNING COMM[UNITY]

UNITING THE SCHOOL, ONE RESIDENCE HALL AT A TIME

The Residential Learning Community Association (RLCA) operates under the Office of Housing and Residential Life. Like APB, RLCA puts on campus-wide events to bring the student body together. Each RLCA member brings in unique ideas and incorporates them into future events.

The distinction between RLCA and APB may not be crystal clear to some. According to the RLCA President, **Brandon Sanchez '18**, the goal of RLCA is to unite the campus and be more of a governing body by centralizing the RLCs.

"Through programmatic outreach, we want to bring the entire campus together and unite the disparate components of campus into one," Sanchez said.

Weekly RLCA meetings are focused yet lively. It is a collaborative environment, filled with creativity and excitement at the prospect of upcoming events.

"We enjoy being around each other. We're a group of friends that just happen to work together," **Naeem Turner-Bandeale '18** said.

These members all exhibit leadership qualities that are necessary for this organization to function.

Behind the scenes, **Nick Moras '17**, the operations director, is the "backbone" of the team because he is in charge of pulling it all together and communicating with facilities.

"Effective communication is really an important part of my job, as well as following up with people because a lot of people have busy schedules" Moras said.

The most rewarding part about hosting a successful event is seeing the student body come out and enjoy it. Midnight Breakfast and S'mores and More were two popular RLCA events that had a successful turnout.

"I think the student body really likes Midnight Breakfast. It's a good way to de-stress, enjoy tater tots and appreciate Santa Clara," Sanchez said.

If there is one thing that Santa Clara students do not want to miss out on, it is free food.

"The S'mores and More event was probably one of my favorites because we had a crowd of people in front of Kenna the entire time. It wasn't until the end of the event that we had to tell people 'it's over.' If the event is going that well, where you have to dismiss people, that is a sign of success," Moras said.

United by their goal of making a difference on campus and bringing together the Residence Halls, RLCA is building a community that embodies the entirety of SCU.

"We have a direct presence in influencing everyday life within those buildings," Turner-Bandeale said.

Helping to display some go bronco spirit, Roya Seyedein '17 covers Jonathan Angulo's '16 face in some war paint before the big game.

GENERATING ENTHUSIAISM FOR SANTA CLARA

ASG EMPHASIZES A BRONCO IDENTITY.

Associated Student Government (ASG) focuses on creating events to fit the entire student body, planning opportunities for students to participate, such as Game Days or "Hamster Ball Madness," and getting students excited to get involved. Some student favorites include: "When It's Not a Great Day to Be a Bronco," tailgates for games, and The Be Heard Desk.

One thing ASG is emphasizing this year is "creating a Bronco identity," Senator **Amy Monzon '18** said.

They worked with Athletics to keep building more school spirit and Bronco pride to support our teams, organizations and clubs.

ASG brings attention to all aspects of SCU and creates a place where students can generate participation and spirit while connecting and understanding various groups of people.

Neil Datar '17 wrote an ASG sponsored survey regarding the housing units for the upcoming school year.

"One of the things I really like to do is gauge the extent of student opinion and figure out what the students thought about this," Datar said referring to the housing units.

Being able to create that space for change is what ASG's values encourage.

By getting involved on campus, ASG provides growth for the student body and fosters "Community, Building, and Identity" Monzon said, through all aspects of Santa Clara student life.

ALL WORK AND NO PLAY MAKES JACK A DULL BRONCO

ACTIVITIES PROGRAMMING BOARD (APB) LEADERS
ORGANIZE FUN-FILLED EVENTS, WHICH HELP
STUDENTS REJUVENATE.

The Activities Programming Board is student-run and known for putting on some of the best events on campus. Some favorites include The Bronco Bus, karaoke night, Silent Disco, petting zoo and the Fall and Spring concerts.

The concerts are the most anticipated events because APB brings in famous bands and artists to perform. Students were blown away by Misterwives this Fall.

"The Fall concert was above and beyond my expectations," Music Director **Marisa Pashby '17** said.

APB aims to organize various kinds of events according to student interest. The Silent Disco with glowing neon lights was a memorable experience.

"People poured in from the moment the doors opened and seemed to have a great time. I was thrilled to have planned something that resulted in others having a great night," Assistant Music Director **Jordan Enos '16** said.

APB's events are not limited to campus. The Bronco Bus takes students off campus for surprise events such as movie screenings or Earthquakes games.

"It's really nice when we have events off campus because transportation can be an issue and the Bronco Bus provides a convenient and a nice way to get out of campus," **Dasha Yeroshenko '17** said.

APB members work hard to get such great events and have become one big happy family.

"APB has helped me grow as an individual, I have learned to be more honest on how I feel about certain things," Pashby said. "Now, I realize the importance of delivering positive feedback to people and have gained skills contacting different companies and so on. I want to go into event planning so joining APB is a great stepping stone to my future."

meeting as they discuss the
upcoming agenda.

EMBRACING DIFFERENCES

THE MCC PROVIDES A PLATFORM FOR CULTURAL EXPRESSION.

Located in Shapell Lounge, the Multicultural Center (MCC) fosters a welcoming and inclusive environment for all who enter. With a mission statement focused on respect for others and the appreciation of differences, every club under the MCC is open to students of all backgrounds. Under the MCC, there are nine cultural student organizations, as well as a new club that was started this year called Chai Talks.

"Chai Talks is a club that was started to transcend racial boundaries. While each club talks about race-specific issues that they all face, I wanted to create a club where everyone could feel comfortable," **Shareen Mann '18**, Advocacy Program Coordinator, said. "I think that the MCC is trying to head in the direction that creates a space for everyone to feel comfortable being in and encourages people to learn about other cultures and have fun doing it."

The MCC is also involved in the Unity 4 movement, which was created in response to a racially charged post on social media app Yik Yak and the sense of discontent felt by the students over the campus climate. Unity 4 focuses on making change in four categories: academics, student and residence life, transparency, and recruitment and orientation. It is an ongoing movement that has already made many "small victories," **Rhyann Robinson '18**, Igwebiue Representative, said.

The Center encourages dialogue amongst others and an exchange of different perspectives. Many of the multicultural clubs form familial bonds out of the compassion others show toward them and the sense of solidarity that they feel. Every MCC cultural club has a type of big-little or mentor-mentee relationship that resembles Greek sorority or fraternity families.

"Igwe feels like a community that you can go back to. It feels like home. It's your check-in point to see how you're doing. You can share your experiences with other people because they have had similar experiences," Robinson said.

"On college campuses where the student population is majority white, it is important for people of color to feel like they have a place to go to share their experiences as minorities. Having a support-system like the MCC is an empowering place where everyone is able to feel safe and learn from others in an experiential way," **Jenn Gonzalez '17**, Co-Chair for M.E.Ch.A. El Frente said.

For many of its members, the MCC is viewed as a second home. Its members are able to stay in touch with their culture, learn through others' experiences and through the community.

ALWAYS WILLING TO LEND A HAND

SCCAP CONTINUES TO REACH OUT TO THE BAY AREA COMMUNITY.

Based on the Jesuit principle of social justice, the Santa Clara Community Action Program (SCCAP) seeks to educate others, advocate for social justice causes and serve the community. It is broken up into four departments: homelessness, health and disabilities, empowerment, and education and mentoring. Each department has Program Coordinators who are the head planners of their respective programs. With over fifty years of service, SCCAP has been heavily involved with different communities around the Bay Area in a blend of service, activism and advocacy.

Students who are involved with SCCAP are always learning about themselves, about the causes they feel passionate about, and about their surrounding community.

"I feel like the hugest part of who I am is because of SCCAP. The people within the organization have challenged me to always learn more, think more, debate more, and listen more," Associate Director **Avery Unterreiner '16** said. "SCCAP offers its volunteers the opportunity to engage with systemic issues on the ground level, and then reflect upon how these systems are supported or can be dismantled by our advocacy."

SCCAP also hosts campus-wide events that manage to bring in hundreds of students, such as Homelessness Week, Immigration Week, Rainbow Prom and Drag Show.

No prior volunteer experience is needed to become involved in SCCAP. Every program serves a different subsection of a community, and members often go to programs across different departments.

"I have learned an incredible amount about social justice issues—locally, globally and within Santa Clara's student body. SCCAP has changed my perception of many things from statistics to individuals," **Alyssa Crooke '16** said.

The Santa Clara Community Action Program is more than just a volunteer organization. While SCCAP volunteers regularly serve in the community, they also seek to examine what the root causes are to an issue, educate others, and implement change.

"Standing up for what you believe in is something that can be frightening. But if you step back and think about all of the things that you can do in your life, as long as you find a cause, are educated on the subject and see it from both sides, what's the worst thing that could happen?" **Allie Mitchell '16**, a volunteer for SCCAP, said.

NEWS YOU CAN USE

THE SANTA CLARA PROVIDES A WEEKLY DOSE OF CAMPUS NEWS, OPINIONS, EVENTS AND ALL THE USEFUL INFORMATION BRNCOS NEED.

The Santa Clara (TSC) covers hot topics – campus safety reports, events, opinions and sports – giving staff the chance to explore their journalism, design, photography and leadership skills. Every Sunday, they sit down and decide what is going to be on which page, but the actual work of bringing the newspaper together happens on Wednesday nights in preparation for printing on Thursday mornings.

The 27 member staff works tirelessly to bring the paper to life. Everyone has their part to do.

“Newspaper is my life. It helps me on personal level,” Editor-in-Chief **Sophie Mattson '17** said. “The staff always makes me happy and jovial. Being around the staff lifts me up.”

The photographers make sure they are right on time to capture notable moments as they hone their skills to become better photographers.

“Every Tuesday afternoon I give out assignments for the following week. We also have our mentors, Chuck and Dan, come in and critique our photos from the previous week so we can continue to improve,” Photo Editor **Eric Bonilla '17** said.

The newspaper also runs a website, and utilizes social media to promote their newspaper.

“We have so much content to offer, not just the front page news. We promote it using word of mouth. Some people don't even know we have a newspaper on campus and that shouldn't be the case, this is one area we need to work on,” Mattson said.

But TSC is not all work and no play. The staff knows that they get perks by being a part of the newspaper.

“Sometimes when I am shooting a game, I will be on the field and my friends on the stands will be like ‘Hey, how did you get down there?’ And I always respond by saying ‘come work for The Santa Clara and you'll be able to get these privileges,’” Photographer and graduate student **Ketan Ratpuj** said.

“We get a really good idea of what's going on on campus and off campus; even though we are not a part of those clubs or events we still get to experience that,” Bonilla said. “That's really cool.”

Strong bonds and close friendships are forged through the process of creating a 104 year old tradition. It has helped them make lifelong memories.

“Cracking jokes while the team discussed the crime report every week was my favorite part; it's hard to forget these times,” **Anas Hussain '16**, freelance photographer, said.

“It's rewarding to see people grow as writers and as editors, especially in their confidence with their responsibilities. Students working as a team learn a lot from each other,” Mattson said. “It is the team effort which helps bring out the best of everyone.”

WHAT'S IT OWL ABOUT?

THE SANTA CLARA REVIEW: A SMALL TEAM DOING BIG THINGS

Students might not suspect that one of the oldest literary publications in the Western U.S. is hidden away in downstairs Benson.

"The Santa Clara Review is a CSO that is known more off-campus than on-campus. It's really cool to go to these big events and have people know us, and then go back on campus and have people confuse us with the newspaper," Editor-in-Chief **Jake Lans '16** said. "It's somewhat frustrating, but it's also kind of cool being a little hidden... We just have our own little niche."

"It is a national literary magazine that takes submissions from all over the country. This is a professional quality literary magazine, and it's run by undergrads," **T.J. Brown '16**, associate editor, said.

With such a large task of receiving, editing and compiling writer and artist submissions into a professional magazine, one would expect a large team behind it. However, the Santa Clara Review is comprised of a small but hardworking staff who put in countless hours in order to produce this magazine. They pride themselves on having a flawless final copy of the Santa Clara Review.

"I think my editing skills came first," said Fiction Editor **Natalie Grazian '16** regarding her skills as an editor and writer. "It's so much easier to be the critique-r than the writer. When I was writing myself, I would question if my writing was good enough to publish."

"You know what the expectation is as an editor—what is publishable material. You can see the shortcuts that writers do and the obvious mistakes. When you're writing a draft, you can't be too judgmental. You have to get it on paper and then work on revisions," Lans said.

The Santa Clara Review is always seeking to publish work from new students. Lans has made it his legacy to spearhead the creation of an online platform specifically for Santa Clara students to submit their work.

"The Owl is completely dedicated to taking all of the voices of people at Santa Clara and publishing them. Whether it's a fiction piece or a poem that someone wrote while walking down the street or an essay, what people have to say here really matters... We want to manifest that in some sort of way," Brown said.

Lans describes the Review as one of the many "intellectual heartbeats" on campus. Literature provides this synthesis of creativity and intellect; it is sophisticated, powerful, and expressive.

THE WILDERNESS IS IN-TENTS

EXPLORE CALIFORNIA'S WILDERNESS WITH INTO THE WILD.

Into the Wild (ITW) invites students who are interested in the outdoors to join them on their weekly trips to explore California's wilderness.

"The cool thing about Into the Wild is that everyone is a part of Into the Wild," **John Strong '18** said.

A common misconception is that ITW trips are geared toward more experienced outdoor lovers. Rather, this club seeks participants of all skill levels. There is no prior experience needed before attending certain trips.

"It's just nice to get off campus. What happens with a lot of us is that we get tied down in one area. You feel constrained and want to get out

more. It lets you relax and get away from all of the stress for a few days. It makes you more productive when you're back at home. It's nice to be off the grid and not be connected to a phone or laptop" **Wright Hudson '18** camp leader said.

Students sometimes feel like they are trapped in the "Santa Clara bubble." They feel like they are unable to go out and explore what Northern California has to offer. ITW offers a variety of activities and a consistency that students need when they are looking for something to do.

A big draw of going on Into the Wild trips is the opportunity to meet and interact with new people.

■ Elise Hermannsfeldt
The Into the Wild group takes a break at the summit of the mountain to commemorate the hike.

"Nobody knew each other beforehand," regular attendee **Eric Bonilla '17** said. "It was just two days, and after that everyone knew each other. Friendships can form quickly when camping, even in the span of only two days!"

"You see the best and the worst sides of people when you're outside in close proximity with them," Hudson said.

Arguably, it is the leaders who make the trip great.

"The group dynamic is amazing. They have around thirty leaders. Some of them lead trips, others manage the club as a whole," said Bonilla.

The leaders facilitate fun, safe and memorable experiences. As a leader,

they are required to go on at least one-day hike and one overnight trip every quarter. In case of emergencies, they are all, at a minimum, Wilderness First Aid Certified and able to think quickly and remain calm under pressure, so the risk of accidents is minimized.

"The most rewarding thing about being a leader is seeing people push their boundaries and get out of their comfort zone" Hudson said.

SADDLE UP

VICE PRESIDENT CORMAC MCOSKER '18 DESCRIBES THE RUFF RIDERS' PLAN TO BOOST STUDENT TURNOUT TO ALL SANTA CLARA SPORTING EVENTS.

As the sun set and the air began to cool, the Women's Soccer team prepared to take the field for their match with Stanford University. **Cormac McOsker '18**, the vice president of Ruff Riders, beamed with joy as he saw one of the largest groups of Santa Clara students file into the Ruff Riders section of the bleachers.

"I felt fulfilled, excited and proud to be a Bronco," McOsker said.

It has been the Ruff Riders' objective to raise awareness of all sports games whether it be by posting reminders or giving out free merchandise.

"We've been noticing an upward trend [in attendance], but it's not ideal," McOsker said.

Despite only being a sophomore, McOsker has a passion for what he does and channels his enthusiasm into his work with the Ruff Riders.

"I love Santa Clara and I love people getting excited about Santa Clara," he said.

It saddens him when he only sees a small number of students support the sports program.

One way the Ruff Riders have been able to boost attendance is by hosting Tailgate events before certain games. At these tailgates, McOsker and other officials in the Ruff Riders get the crowd energized and excited for the coming sporting event with free food and loud music.

■ Ketan Ratpuj

■ Ketan Ratpuj
[Above-Left] The beloved Broncos' mascot 'Bucky' shows off his brawns during a women's volleyball game.

■ Ketan Ratpuj
The high spirited Ruff Riders go shoulder-to-shoulder to display support for the home team.

"It's like a get together environment when we're all going to enjoy this moment together," McOsker said.

That fervor generated from the event carries over to the game, but is not able to endure the entire game. McOsker sees this spike of attendance during these events and wants to be able to host more of these events but is unable to due to a lack of funding.

To rectify this problem, McOsker has developed a five year plan to grow Ruff Riders even more, despite it being the largest student organization on campus.

"What we need is more infrastructure and more funding," he said.

In addition the current executive board of 15 members will be dramatically increased to 50 members.

"There will be a power structure as part of the five year plan with the idea of putting more people in power positions, leadership roles within Ruff Riders so people can spread more influence," McOsker said.

After spending the summer getting people excited for athletic events and seeing his hard work pay off at the opening women's soccer game, McOsker will continue to work on spreading awareness for his team.

"It makes me proud to be a Bronco."

BRONCOS FIND DEPTH

REFLECTING ON HOW CAMPUS MINISTRY HAS IMPACTED THEIR LIVES

For every young adult, college is a transformative time, a place where realizations are made and important decisions take place, and one's extracurricular activities can have an immense influence on their experience. Campus Ministry is an example of such a transformative place, where all are welcome to share their beliefs and practice their faith.

"[Campus Ministry] allows students space to be respected for whatever beliefs they might have and encourages all students to have dialogue about faith and spirituality," President of the Christian Life Community program, **James Harrison '16**, said.

Harrison became involved in faith groups during his senior year of high school and chose to strengthen his relationship with God during his first year at Santa Clara by becoming a part of Campus Ministry. Others, such as Hospitality Intern **Gus Hardy '16**, have been part of a spiritual program throughout their entire lives.

"It was familiar to me, and helped me find a point of stability," said Hardy, who felt Campus Ministry was a crucial element to his college experience.

Regardless of background, Campus Ministry has provided students a place to meet other Broncos with similar interests and passions.

"Through Campus Ministry, I have encountered people I never would have otherwise who have become some of my closest friends," **Sarah Anderson '16**, a retreat ministry intern said.

Through the Campus Ministry program, students have found close friends that have lasted throughout their four years.

"This is a place where you find friends of real depth and substance, who I've been able to build true and lasting friendships with," said Hardy.

Not only has Campus Ministry had an influence on the physical experience of its members, but on their spiritual life and personality as well. Ministry leaders put on group activities, faith building programs and worship services, all of which serve to help members grow in their faith and grow as people. Activities such as these have helped shape its students into better versions of themselves by encouraging self-reflection and sharing life experiences.

"I have noticed myself change in my love for others and in my understanding for others," Harrison said.

These programs require dedication and hard work to organize, but student leaders feel that it is worth shifting around their schedule to fit in time for Campus Ministry.

"The knowledge that God is present in my life has given me the stability to properly plan, juggle activities, or find a space to just take a minute and be with God," said Hardy regarding how he copes with balancing his work in Campus Ministry and his academic work.

THE BACKBONE OF RES-LIFE

CFs ACT AS MENTORS TO HELP RESIDENTS NAVIGATE THE COLLEGE EXPERIENCE.

Community Facilitators (CFs) provide a lot of support in building a residential community within their halls and seek to create a floor dynamic that is friendly and welcoming. The "Open Door Policy" that many CFs suggest for themselves and their residents has helped to promote this familial bond amongst a floor.

"The tone that you set the first three weeks will determine how the rest of the year goes. I think that if you're very open in the first few weeks and encourage your residents to talk to each other and get to know everyone, then they'll relax more," **Dayna Obenauf '17** CyPhi (Swig) CF said.

CFs are also responsible for putting on programs for their floor and Residential Learning Community (RLC), from socials to performing arts programs to informational programs about relevant issues in the news. With any program, food is always one of the top motivating factors, along with extra credit.

"My favorite are always the diversity ones because that's what I'm all about—diversity and social justice," **Jenn Gonzalez '17** Unity (McLaughlin-Walsh) CF said. "I think it's also a way for people to learn a little bit more about things that they wouldn't normally talk or learn about. I like that our RLC and other RLCs are really about integrating someone's education."

The efforts of CFs should not be overlooked. With extensive program and bulletin board planning, countless hours of being on duty, weekly meetings, and acting as a role model to the community, CFs are saddled with a tough job where time management is key. However, the benefits of this job far outweigh any negatives.

"I didn't realize how much I really enjoyed being a resource for people and being that person that other people look up to and feel comfortable talking to. I didn't think that I would love it so much," **Chris Grove '17** Xavier (Sanfilippo) CF said.

Building a community can be difficult, especially when everyone has different personalities and interests. Part of the job of being a Community Facilitator is to create this environment where individuals are appreciated for their uniqueness and celebrated for their differences.

"The amount of love that you receive from people is insane. To me, being a CF has been the best thing that I've done in my college experience and my life. It's taught me so much about people, being a leader, and a good human being," Gonzalez said. "You always have an impact on someone's life, and that's really meaningful to me."

PURSUING PASSION

A VARIETY OF MAJORS COME
TOGETHER TO INNOVATE.

Through the three C's, competence, conscience and compassion, the School of Arts and Sciences follows the Jesuit tradition of educating the whole person to succeed in our ever-changing world. Offering 35 majors and 40 minors, the college provides a wide variety of educational opportunities and has created an environment where students are encouraged to pursue a degree that excites them and are supported along the way.

"The school offers a broad area of study as well as the integration of spiritual practices into classes" Dr. **Tamayo-Moraga**, the faculty director of Unity and a religious studies professor, said. "Some umbrella differences I see in students over their four years in the school are students become more comfortable that their worldview is not the only one and students begin to respond rather than react to ideas that are different from their own."

"The College of Arts and Sciences gave me the opportunity to take a variety of classes in different fields so I could get a better idea of what I wanted to do as a major. After taking so many different classes, I decided to pursue my passion of computer science. I do not know if I would have come to the same conclusion if I was not given the freedom that the School of Arts and Sciences provides," said **Steve Tointon '19**.

Although Tointon's experience within the School of Arts and Sciences has just begun, it has already opened doors and allowed him to have experiences in fields other than his major.

Students have also found a plethora of opportunities within their majors.

"Being able to TA in general chemistry labs has given me the opportunity to explore another passion of mine which is teaching," said **Aneka Khilnani '17**.

BUSINESS THROUGH THE YEARS

STUDENTS EXPLAIN WHAT THEY DO DURING EACH YEAR AT THE BUSINESS SCHOOL.

The Leavey School of Business has worked hard for over 90 years, preparing young men and women to become the future leaders and innovators in Silicon Valley. Today, the dean and professors have structured their respective areas of study to help every Leavey student find the program that best suits their interests, as well as helping them enter the business world.

Unlike some first-year students, who start their time at Santa Clara not knowing what they want to major in, **Sam Suri '19** was confident in his choice to declare a major in Finance.

"I chose finance because I love the fields of economics and politics, along with current events and investing. Finance seemed to be a perfect blend of all four," Suri said.

Suri hopes to fulfill Santa Clara's mission for education to benefit society, by coupling his finance knowledge with a minor in political science.

"I want to be able to positively improve the world around me with my acquired knowledge and skills," Suri said.

Junior year comes with many responsibilities, but **Jennifer Mick '17** has a grasp on what she wants to do with her Marketing major.

"I had a marketing job with Intel this summer and have an offer extended to me for after graduation as well," Mick said.

In her free time, Mick has been proud to work with a non-profit organization called Camp Kesem, which helps young children whose parents have been affected by cancer. Mick learned many management skills and experienced what it's like to run a business.

"I've never been more proud to be a part of something in my life," said Mick.

As a senior, **Kelli Fujinaga '16** gained experience in her field of Marketing thanks to the classes she has taken through the Leavey School of Business.

"The required core classes outside of my major feel like they have helped me develop knowledge and skills that will be useful to me in the future," Fujinaga said. "I also valued every story my professors shared about their real-life experiences and how the class assignments would apply to us once we began our careers."

Looking back at her four years, Fujinaga wishes she would have been more involved and offers advice to younger students to make the most of their time at Santa Clara.

"I would take any opportunity that comes your way and force yourself to step outside of your comfort zone in order for yourself to grow as a person," Fujinaga said.

A TECH-SAVVY DISCIPLINE

THE FUTURE CONTINUES TO LOOK BRIGHT FROM AN ENGINEER'S PERSPECTIVE.

In the heart of Silicon Valley, an engineering degree is one of the best assets anyone could wish to acquire. That much was reaffirmed this year, when U.S. News and World Report ranked SCU's Undergraduate School of Engineering as 12th in the nation, at institutions specializing in undergraduate and masters degrees. How the faculty for the engineering department incorporates the application of electrical, chemical, mechanical and other engineering principles into real-life working situations is evident in the broad spectrum of majors, courses and programs that are available.

"As a computer science and engineering major, our coursework includes classes in the subjects of computer science, mathematics, electrical engineering and physics," **Andrew Torrance '19** said. "The goal of a B.S. in computer engineering is to teach students the theory behind the implementation of computer software and hardware structures and systems, while those students acquire problem solving skills that can be applied to their future careers."

With computer science and software engineering being some of the fastest developing fields in a tech-heavy industry, there are no shortages of internships with companies such as Apple and Facebook as our neighbors. Engineering students have taken advantage of such a prime spot for innovation and development that they have chartered some designs themselves.

"For the last year I have been interning at FileMaker which is a subdivision of Apple and have taken the skills and theories I have learned in class and exponentially grown my understanding of those principles at Apple," **Parker Newton '17** said.

For computer engineers, they must also be experts in computer science and math, while possessing a familiarity with the subjects of electrical engineering and physics.

"The courses we take help apply those skills to the development of usable systems," **Chloe de Guzman '17** said. "Personally, my career goals are to work as a software development engineer, and design and develop software applications that run on the desktop, mobile, web and server platforms."

Engineering school undergraduate and graduate students continue to establish their skills inside and outside of the classroom while optimistically planning for bright futures in the Silicon Valley.

EXPECTATIONS VS. REALITY

EXPERIENCES BECOME MUCH
MORE THAN EXPECTATIONS.

When studying abroad, experiences often begin with a variety of expectations. Whether those expectations are about the difficulty of the language barrier, the frequency of traveling, or the differences between foreign and American cultures, it can be difficult to completely eliminate expectations.

Lindsay Tenes '17 went abroad Fall quarter to Argentina through an Institute for the International Education of Students program.

"I expected it to be hard because of the language barrier and not knowing much Spanish. I freaked out about it, which turned out to be true, it was hard," Tenes said.

Tenes had some fantastic unexpected highlights.

"Spring break in October, Southern hemisphere, interesting concept! I got to see Patagonia, which was the first time I had ever seen a glacier," Tenes said.

Visiting the demilitarized zone while abroad was an experience that surprised **Nick Young '17**. He went abroad to Hong Kong through a Syracuse University program.

"To see it with your own eyes, feel the air, and see what's going on; it's a humbling experience and makes you realize what's going on in the world," Young said.

Allegra Thomas '16 visited a completely different part of the world during her abroad experience. Instead of choosing popular locations in Europe, she chose a School for International Training journalism program in Morocco. She tried her best to be open-minded going into it.

"I expected Morocco to be completely different, unlike anything I had done before," Thomas said. "I tried to not have many expectations. I didn't do much research before, I didn't make many travel plans. I let it all happen, which I think gave me a better experience."

Thomas' program didn't allow for out of country travel, which she expected to be bummed about because traveling to visit other friends abroad is often part of the experience. For her, "it ended up being so rewarding staying in the country and taking weekend trips to little authentic towns on the coast or in the Atlas Mountains instead," which she didn't expect.

Young's best advice for experiencing the unexpected abroad, "try new things, you don't know if you like them!"

[SPECIAL FEATURES]

■ Ketan Rajput

Broncos can express their talents through many outlets, celebrate what makes them special, and this year got to witness Super Bowl 50 with a front row seat. Every year brings new experiences and challenges that make it unique. The drought taught us to rethink how we use water. Religious clubs opened the doors for dialouge. Whatever Broncos chose to take part in, it built their code.

GOLDEN GAME, GOLDEN STATE

**SUPER BOWL 50 LEFT ITS MARK
ON THE CITY, BRINGING THE
PARTY TO CAMPUS TOO.**

In the normally sleepy city of Santa Clara, February brought on quite the wake up call as the 50th Super Bowl game descended onto Levi's Stadium, bringing the celebration to campus. A plethora of fans, celebrities and football players filled the Bay area in anticipation of the big game. In addition to the many festivities going on in the surrounding area, SCU also had its own lineup. Events like a pep rally, Celebrity Sweat scrimmage game, Huey Lewis & the News concert and more engulfed a section of campus, ramping up the energy amongst the student body.

"Everyone was there to talk about the Super Bowl or to see the players here, so it was a really cool energy. It's a national event, so everyone was watching. It really makes you think, 'Oh my god, this is so important,'" Exchange Student **Anna Nunes** said.

Such a huge event certainly doesn't happen everyday around here. As such, weeks and even months worth of planning went into making sure the campus ran smoothly.

"This is a huge deal for our campus and everything leading up to it. We were working with the county and with campus safety, trying to make sure everything would go very smoothly, since we were expecting so many people," **Marissa Ferry '17**, Student EMT and Super Bowl 50 Celebration volunteer said.

Even with the bustle of the on campus festivities, students also managed to have their own individual celebrations for the big game. From RLC-hosted parties, to relaxed individual viewings, everyone found their own way to celebrate. With all the hubbub going on, from anticipation of the Super Bowl until the game finished, for some it seemed to go by in a blur.

"It was just a whirlwind of everything from getting my work done, being able to do the events around here, and going to the Super Bowl. It all kind of flew by," **Matt Glazier '16** said.

That doesn't mean that the events didn't leave their mark.

"I gave directions to Parks and Recreation's Jean Ralphio [Ben Schwartz] and Law & Order: SVU's Mariska Hargitay, which was really cool," Glazier, who volunteered as an usher at Levi's Stadium during the Super Bowl, said. Other celebrities like Ludacris and many NFL players even made appearances for the big day.

With so many opportunities to make lasting memories, Super Bowl 50 certainly held up to its golden anniversary name.

CELEBRATION SENSATION

MCC CLUBS EXPLORE CULTURES
THROUGH MUSIC, FOOD AND
ENTERTAINMENT.

Under the umbrella of the Multicultural Center, there are nine different cultural clubs. Every year, many of these clubs host events aimed at showcasing their culture through food, entertainment and their members' talents.

After months of practice and hard work, Intandesh has their annual culture show in April called Rangeeli Shaam.

According to **Arman Elahi '16**, the coordinator for Rangeeli Shaam, the show is sure to be "high energy" and "upbeat".

"We had an Alumni night recently. One of the questions that I asked was, 'What was your most memorable moment being a part of the club?' They all said the culture show," Elahi said.

K-Igwe 1967: Beats of Our Past is a culture show in February hosted by Igwebuika that focuses on exploring the history of African American music and its development alongside history.

With hours of practice a week, "it's a great way for our club to bond and for new members to meet older members," **Zipporah Ridley '17**, the coordinator for Beats of Our Past, said.

Culture shows are a great way to teach people about the experiences of others. Both Intandesh's Rangeeli Shaam and Igwe's Beats of Our Past seek to educate and celebrate their cultures and the diversity of others.

"This show is a way for the club to come together and present to the school, friends and family just a small part of where our culture comes from," **Ivy Wakaba '16** said.

[CULTURE SHOWS]

GOT FAITH?

RELIGIOUS GROUPS

EXPLORE THE SPECTRUM OF SPIRITUALITY.

Diversity of spirituality is important to have on a college campus. The student body is exposed to the beliefs of others and able to learn from their similarities and differences. Campus Ministry programs focus on fostering an understanding between people of varied religious traditions. Along with these programs, there are Interfaith Dialogues and student religious clubs that add to the religious experience for the non-Christian members of the University.

"I think religious diversity is important because it helps bridge the gap between varying religions and dispels stereotypes. It also makes interfaith relations a more accurate representation of the religions because they would be speaking for themselves," said **Salma Magid '17**.

"Diversity is such an important asset. If everybody's the same, you're not really learning anything. I feel like it's really important to be aware of the different religions," said **Aida Ibrahim '18**.

The Muslim Student Association is one of the newer student religious clubs on campus. Even in its early stages of being a club, Magid said, "The community aspect is very friendly and welcoming."

Iaisha Sadat '19 said that she first learned about this club after talking to MSA members during the Difficult Dialogues meeting about understanding Islamophobia. When discussing how Muslims are portrayed in the media, Sadat said, "There are a lot of misconceptions. For me, they are like a research paper that has no citations. They have evidence, but that evidence has no citations. How do you know if it's right or if it's made up?"

TODAY'S GRADS FOR TOMORROW

GRADUATE STUDENTS WORK TO CREATE A PROSPEROUS FUTURE.

Pursuing a master's degree is not an easy path but valuable to those who choose to take it. Many students decide to continue their education in order to build upon what they learned as an undergraduate student.

"I most like that I have the opportunity to get more in depth knowledge about topics that interest me and explore new areas in computer science that I have not previously learned about," **Amanda Holl '16** said.

Holl graduated with her Bachelors of Science in Web Design and is currently working towards a completing a master's degree in Computer Science and Engineering.

Daryl Rodrigues '16 is also studying to complete a master's degree in Computer Science and Engineering and has furthered his experience in the field by taking up job positions that put his talent to use. "I have been working on campus for more than a year at the School of Education and Counseling Psychology as Admissions data processor," Rodrigues said.

The courses for graduate students are tough due to the fast-paced nature of the quarter system and vast amounts of material students must absorb in such a short period of time. Graduate students both enjoy and dread the challenge.

"It has been a fun and challenging course," **Raj Adiya '16** said.

Santa Clara's graduate program culminates with a Capstone project where students display what they learn in an innovative way. SCU has always fostered a role of social justice in students' work, and the graduate students prove that they are ready to make a difference in the real lives of people.

Not only do these projects display technological advances, they can also show how Santa Clara students can help build a better world. "I am developing an educational game designed to interest girls ages 5 to 8 in computer science," Holl said.

Similarly, Rodrigues worked on a program to help lupus patients that has had the support of several lupus foundations in Northern California. "This project involves a lot of research focused on understanding requirements to design a user friendly application for lupus patients," Rodrigues said. "I hope to make a small contribution."

THE SHOW GOES ON

LOVE JONES CONTINUES TO UNITE ALL.

Over a decade ago, Broncos gathered for the first Love Jones inspired by a film with the same name in a little coffee shop somewhere on campus. Flash forward to today, a typical Love Jones includes everything from live music to Hit The Quan contests, all taking place on the fully decked-out stage of Locatelli.

To ensure that each show takes place successfully, this means no slacking for the planning committee at anytime of the year.

"It definitely takes the whole quarter to plan even though it typically happens around Week 6. Me and my promo team meet once a week to do updates on where they are with their jobs, getting together decorations, making the posters, creating the event on Facebook, doing PR, other advertising and all that," **Taylor Kee '18**, Love Jones event planner, said.

Despite the time and effort needed, the hard work always pays off when the show comes together. "After each performer comes off stage they typically go and thank me that they had this opportunity to just come on stage and share their talent," Kee said. "They might even start crying and it feels good to know you did all this and it was you that helped make someone else's dream come alive."

Kendall Chase '18 on the decorations committee echoes this sense of satisfaction that comes with the end of every Love Jones. "Everyone's just super happy and Hipnotik always ends the show. It's always really high energy and it's just cool to see what you put on for everyone," Chase said.

Lyndon Enow '17 is a performer and a marketer on the promotion team who ensures that the experience is equally gratifying on both sides. "I'm a pretty energized person. I'm very vivacious as some may say. But as a performer, it's really nice to hear people that are shocked at the fact that I sing just because it doesn't really fall into my personality because I'm just so goofy," Enow said.

Love Jones has come a long way since its beginning as an open mic poetry slam night. Even though it has evolved into one of the most well-known events on campus and has unique seasonal themes each time it is put on, ranging from Soul Train to Award Shows, it stays true to its roots by always including poetry in the show and giving everyone an opportunity to perform.

"It brings different parts of campus together and it's kind of an opportunity for students to showcase talents that other students didn't know they had in a way that unifies the school. There are kids that are in all different types of clubs, Greek life and everything, and they're able to just come together and put on the best show they can with talents they have," Enow said.

IT'S ALL GOOD IN THE NEIGHBORHOOD

Bellomy. Alviso. Lafayette. Washington. White lettering on green signs become symbolic, for these streets are more than just that. They are the places where memories are made laughing, playing Die on artfully crafted tables, and dressing up in obscure outfits with all your friends. They are the places where every home is lovingly named and takes on a personality of its own; Sand Castle, Power House, Skybox, Grove.

"Being off-campus gives you a freedom you can't get anywhere else," said **Derek De Sola '16**, who lived off-campus all four years.

Whether its paying bills or feeding yourself, moving off-campus presents new challenges that are not always experienced in residence halls.

"I'm not good at cooking for myself or continuously buying groceries," **Paulina Urbanski '17** said. "But it's been fun not having to deal with dorm rules."

In an effort to more deeply connect off-campus life to the school, the

neighborhood ambassadors program was created. **Mike Muchemu '16**, **Jordan Enos '16**, **Areany Tolentino '17** served as this year's ambassadors.

"As neighborhood ambassadors we're tasked with coming up with programs for off-campus students that bring school resources to our neighborhood," Muchemu said. "The best part of being an ambassador is having the right information to calm off-campus residents down about issues to do with the school. There's a lot of misinformation coming from a communication gap. Being able to fill that gap for the students makes me happy."

Located on 862 Market Street, the Office for Off-Campus Living has hosted cooking classes, police outreach and other programs. The office itself is always open to students.

"Everyone is more than welcome to stop by our office anytime! There's free tea and coffee," Muchemu said.

■ *Paige Mueller*
Tony Caballero '17 enjoys a warm Fall day to the sounds of Jai Wolf.

■ *Claire McBride*
The Office for Off-Campus Living is located right across the street from Duane. Students are always welcome.

INITIATIVES TO INTEGRATE THE OFF CAMPUS COMMUNITY COME TO LIFE.

A widely discussed topic was the introduction of Neighborhood Units. Starting the summer of 2016, 20 university-owned houses will be renovated and converted into extensions of on-campus residence halls.

"I think it's pretty inevitable for the school to take control of their off-campus units, especially with the struggle I've seen students go through with specific local landlords," Muchemu said. "I honestly believe the school would take care of off-campus residents and their living conditions way better than a for-profit private company."

"Neighborhood units are the school's ploy at making the neighborhood happy at the expense of the students. Although they market that this will be good for maintenance and whatnot, they are taking away from students' ability to live freely like the adults we are," De Sola said. "Also I am uncomfortable with the school controlling rent."

For Urbanski, who lives in a future neighborhood unit and plans to stay there, there is good and bad.

"I'm curious to see how it goes because I'm not sure how the university is going to enforce housing rules within all of the neighborhood units, but I'm excited to see what they do if they refurbish the insides of the houses," Urbanski said. "My biggest hesitation in living in a neighborhood unit is that it'll remind me of freshman year. I'm going to feel like I'm stuck on campus."

But for now, off campus life remains an integral part of the Bronco experience.

"If I could change one thing, it would be the student-neighbor relationship," Muchemu said. "I would love it if students were more excited about meeting their neighbors and proactively working towards creating an engaging community."

FUTURE LEADERS

DEVELOPING PERSONAL CONNECTIONS IN A PROFESSIONAL WORLD.

Dressed sharply in professional business attire or dressed down in their Greek letters, we can often see brothers of the professional business fraternities out tabling, fundraising or collaborating on group projects.

The Psi Omega chapter of Alpha Kappa Psi (AKPsi) is a co-ed professional business fraternity that is open to students of all majors. Bringing in members from the College of Arts and Sciences, the Leavey School of Business and the School of Engineering allows for a diversity of perspectives.

"Because we have so many members from so many fields and majors, there is usually at least one person you can contact to help you find an internship or job in your field of interest. Most brothers are more than happy to share their experiences with you from going abroad to working at certain companies to reviewing your resume before submitting it to a job," said **Celia Boone '18**, member of the Chi class of Alpha Kappa Psi.

"For me, AKPsi has definitely changed my Santa Clara experience. I've grown so much as an individual from it and have been able to push myself," **Daniela Lorenz '18**

The Gamma Xi chapter of Delta Sigma Pi (DSP) is a co-ed professional business fraternity whose members are comprised of students of the Leavey School of Business or Economics majors in the School of Arts and Sciences.

"The leadership that I gained from DSP is really important because it made me see how to run an organization," Delta Sigma Pi brother **Tiffany Iskander '16** said. "That encouraged me to develop other organizations. I'm the president and founder of Santa Clara Consulting. I also co-founded UNICEF at Santa Clara University."

Both of these business fraternities emphasize the importance of professionalism, self-improvement, career-mindedness and the bond of brotherhood. Members learn the importance of presenting oneself in a professional manner through email training, public speaking tasks, interviews and resume and LinkedIn labs.

"I think that the biggest benefit is time management," said Delta Sigma Pi brother **Sarah Choi '18**.

Brothers are also privy to business fraternity events or conferences, where brothers of AKPsi and DSP can interact with the other chapters of professional business fraternities to hold case competitions, public speaking events, company tours, or networking events.

"One of the greatest pieces of advice that I got was 'the network that you build now can be sustained into the future.' The community that you have now is so valuable," Iskander said. "You learn so much together with them."

LEARNING ON THE JOB

BRONCOS TAKE THE FIRST STEP IN ENTERING THEIR FIELDS.

Classes give knowledge, but internships are where students get a chance to apply what they have learned. While working at an internship, they learn and experience more than just their job.

"Sitting in the classroom and learning is obviously not enough, so getting outside experience is really good for supplementary learning," **Hana Seligman '16** said.

After years spent in high school, and now college building up a solid foundation, students can take the next step when it comes to their internships and gain further experiences. Anything from work ethic to communication skills can be improved upon in more professional settings.

"All of those features in communication I don't just apply to my work, it applies to all parts of my life," **Alex Golden '17** said.

"I've been able to take my knowledge from my internship to other leadership positions," **Suparna Jasuja '16** said.

By working in teams, students participating in internships gain different perspectives and experiences working with others, and strengthening their leadership.

In working alongside their team members, students were also able to collaborate with more skilled employees in their field. To be able to overcome difficulties that arise during work is the mark of a well-developed, cooperative and communicative team.

"It's a very rewarding environment at Apple and all of my co-workers are bright and always willing to help interns out, very inclusive," **Parker Newton '17** said.

"It's not just one person that changes, you have to change the mindset of the whole team," Golden said.

■ Center for Sustainability
Lauren Betschart '17 stands under the mock shower at the "60 Seconds or Less" event to promote shorter showers.

THE THIRST IS REAL

ASG'S "60 SECS OR LESS" CAMPAIGN TAKES SHAPE.

In the midst of one of the worst droughts to ever hit California, SCU has pledged to do its part to combat the negative consequences of water shortage. Based on the water conservation projects and concepts that have been implemented in areas ranging from the student dorms and campus grounds to the Forge Garden, there is no denying that even the tiniest of changes can go a long way towards making the necessary changes needed to help alleviate the drought.

"This drought is scary and historic. ASG is eager to help students take responsibility for their water usage. Part of our Off Campus Housing Orientation includes giving smarter shower faucets, sink aerators, and (hopefully) shower timers to help off campus students save water and money," Student Body President **Aaron Poor '16** said. "What I think is easy about saving water is so often you save money as well. We are continuing our 60 Seconds Less initiative to get students to actively take 60 seconds off of their shower."

Not only has it affected on-campus daily activities, it has even also affected the daily activities of the Forge Garden.

"Due to the drought, the focus of our greenhouse activities and crop/flower selection has shifted to drought-tolerant species and California natives, such as Lupines," Forge Garden Manager **Kathaine Rondthaler** said. "The garden is also on a drip irrigation system so that the crops growing outside and in the greenhouse are not overwatered."

As water plays such a major role in many aspects of our lives, the amount we use cannot be reduced in one drastic swoop. The main thing here is to recognize that there are certain areas that students tend to unnecessarily overuse water in and focus on ways to eliminate such wasteful expenditure.

"With many of the fountains turned off and technology updated to current water usage standards (such as underground sprinklers), the grounds crew mainly monitor these fixtures as well as leaks, which are the main sources of unnecessary water usage," Ground Maintenance Supervisor **Gary Vargas** said.

A PLACE OF MAGIS-TY

AS SCU ENCOURAGES US TO
STRIVE FOR BETTER, THE RRC
HELPS TO SHOW US HOW.

Tucked away in a modest room in the basement of Benson Memorial Center sits the Rainbow Resource Center (RRC). For students that use the center, oftentimes it's a place where they can fully be themselves – whether that's in gender, sexuality, or any other part of their identity.

"When living your life day to day, for example on forms that you're signing, and it asks for your gender and it says male or female. You can ask, 'Well, where's me?' But imagine living that one experience all day. And then imagine not having this space. That was high school for me, and that's high school for a lot of kids," **Glenn Bradley '16**, a student coordinator for the RRC, said.

The name itself is an umbrella name of an organization that encompasses three primary groups: GASPED, Spectrum, and Santa Clara Queer. Primarily, they provide a safe space for all those within the LGBTQ+ community and its allies to come together and socialize, gain support and educate others about the realities of the LGBTQ+ community.

Put simply, it's a place where community can happen. Gradually, we have seen this community grow and gain more visibility. But even in a country that has made strides over the years to bring more rights to the LGBTQ+ community, there is still a perceived disparity between values of inclusivity and those values of traditionally religious groups, such as the Jesuits. However, in the spirit of Santa Clara's traditions of educating the whole person and striving for justice and excellence in all things, the RRC stands as evidence that the two groups are not so diametrically opposed.

"By educating the whole person, that goes along with all the different diversity aspects that should be brought into a person's experience," **Adrian Chavez '16**, the RRC media manager, said. "The more diversity experience you have, the more you know where people are coming from and how people go about their daily lives, which is invaluable."

"Having a center that provides students to be able to work here and go out and educate their peers, or raise awareness amongst their peers, I think speaks volumes to the educational experience in general," Program Director, Danielle Aguilar said.

As the RRC continues to develop and expand, the group hopes to gain more visibility and become more integrated into campus life, both by providing a place of refuge, as well as educating the rest of the SCU community as to what they can do to make campus a more inclusive and inviting home.

Nicole Obuobisa '17 leads a solo during rehearsal. While she sang, Obuobisa also played in the string quartet.

PERFECT HARMONY

CHOIR KEEPS THE MELODY GOING

Hitting the right melody is essential to producing the right notes at the right time for singers, but it's a lot easier to do so when you are surrounded by other brilliant singers. There are two singing ensembles, Concert Choir and Chamber Singers, that never fail to bring throngs of sitting people to their feet during their concerts. The experience of singing in SCU choirs has truly livened the college experiences of the approximately eighty students who join Dr. Scott Hanna-Weir's ensembles every year.

"In my three years at SCU so far, I have been a member of both Concert Choir and Chamber Singers. I really enjoy going to choir each rehearsal, and Dr. Hanna-Weir's funny remarks always brighten up my day. The passion he brings is really unmatched, and he is a major reason why most of us take part in this program," **Kristi Hong '17** said.

The two ensembles are similar in their grouping and approach (in regard to singing), but the skill level is what sets them apart from each other. Concert Choir is great for people who have minimal choral experience or want to try it for the first time. Similarly, Chamber is perfect for those who already have a more extensive history and ability with choral singing.

"Every piece we do has some meaning, but my personal favorites have been singing the 'Faure Requiem' when I was in Concert Choir and Pentatonix's 'Run to You' at the last concert in Chamber," **Valerie Bright '17** said.

Every year, there is typically the "Festival of Lights Concert" in December to join in on the Christmas festivities and singing songs pertaining to it, and there is a concert near the end of the Spring quarter that has another overall theme.

"Last spring, we had a chance to sing and treat the audience to a rendition of some of the selections of Mozart's Vespers. When you're singing pieces like his, you get lost in the moment and it really is a special feeling," **Arman Elahi '16** said.

As the group continues to expand they continue to find new members of the community who lose themselves in the notes of the music.

YOU DON'T NEED TO KNOW ART TO DO ART

**ART CLUB ALLOWS BRONCOS TO
FLEX THEIR CREATIVE SIDES.**

On Tuesday nights, the sculpture room is filled with excited voices as members of Art Club share their creations during art slam and discuss new projects. The creative and innovative atmosphere in the club provided a change of pace for students, letting their ideas run wild.

"Art slam is more of a sharing atmosphere. Whether it be in class or something you made outside of class, we just immerse ourselves in art," **Professor Ryan Carrington** said. "It's about sharing your art and also about the greater knowledge of art within contemporary society."

"I want to help some people have an opportunity with something they didn't have before, I want to provide students with a new experience," **Hannah Baker '16** said.

The highlight for the club so far has been the installation for the San Jose Children's Discovery Museum. Since students don't have to be an art major to join art club, its members come from all walks, and these unique perspectives led to the creation of a wonderful exhibit piece from recycled materials.

"They gave us materials like plastic chocolate trays, string and plastic bottles and just said to play with them and make whatever you want," **Nicole Nguyen '19** said. "Someone made these golden rings, others made a snowflake pattern and everyone brought their ideas to the table."

After the Children's Discovery Museum project, the students were also able to showcase their work in the Generation Z exhibit, giving all of the students a chance to officially showcase their art.

"The art show was super exciting because this doesn't typically happen. There's not usually a student show other than a senior show. This gave people an opportunity if they were less involved in art classes but made something they were really proud of," said Baker.

"It's about looking at art here, making art on campus and looking at art in the greater Bay Area and getting that exposure," said Carrington.

[PERSONALITIES]

■ Paige Mueller

The key component to the SCU experience resides in the each unique student. Each of the personalities converge on campus creating a combination like no other. The smiles, laughter and chatter on the way to class assures students that beyond the stress of midterms, we all come together as Broncos.

MOUNTAIN CONQUERER BARRY BISHOP '19

My family has a history of climbing. My dad and my grandfather is where I get it from. My grandfather started climbing and then got into photography, which led him to be on that Everest expedition shooting for Nat Geo.

They've both been to Everest. I think I will do it too, not only as a feat of accomplishment, but also to keep a tradition. I would need to condition for a couple years before attempting, but I hope to do it.

I can't actually remember the first time I went climbing. I think I was ten. It was a rock climbing gym, but the first time I went climbing was when I was in 3rd grade in Moab, Utah. It was pretty scary the first time, but it was easy now that I look back on it.

The hardest climb I've ever done was climbing in the Grand Tetons; I was fatigued because I didn't sleep well before the climb. It was a day climb, with of 13,775 ft. elevation gain.

That wasn't my tallest climb though. Mt. Rainier was taller. It was 14,417 ft., and it was on a climb I participated in with the wounded warriors. Mt. Rainer was like a big hike, but it gets difficult and is precarious. The weather was nice that day. We actually climbed on Fourth of July. It was a two-day climb. The first day we hike to a base camp, and the second day is going from the base camp to the summit and back down to the bottom. We were with the wounded warriors on July fourth and the sun was rising as we were reaching the top, so it was very remarkable seeing people with prosthetics climbing along side of us.

The most memorable moment on that hike was the sun rising as we were reaching the top, so it was very remarkable seeing people with prosthetics climbing along side of us.

LATIN IMPORT ALFREDO SEPULVEDA VAN HOORDE '19

As an international student, it is hard to come to a different country with a new culture. Fitting in becomes a challenge. The first few weeks of school were difficult for me. I was feeling homesick, and I was struggling with getting used to everything new in my life. Thankfully, I was not the only one going through this. Meeting other international students, as well as other Latino students, helped me get over my homesickness and made me feel more confident in this new environment. With their friendships, I have now left behind all of that. SCU wasn't a difficult choice for me. When I learned about its Catholic values, its location, its campus, and its academics, I knew SCU was the best fit. So much so that, in fact, I didn't apply to any other schools. I remember when I visited the campus for the first time I was amazed at the level of happiness between all students. I instantly thought to myself: "This could be me". I've made many lifelong friendships and I can feel myself getting closer to becoming a great professional when I graduate. Until then, I'll make sure to enjoy every moment of my life here at SCU.

THE MUSIC MAN REECE JACKSON '18

Reece Jackson's band name, *The Runaway Butlers*, was decided after a post-prom show at a bar. An intoxicated guy asked if they were "the scrawny butlers" because they still were rocking tuxedos from prom. They decided to keep butlers but nix scrawny in favor of runaway.

The members have all been friends since their early pre-teen days and performed at their school's Coffeehouse shows twice a year.

"We started off playing music because we enjoyed it. We never really wanted to try to change what we do or anything based on our audience. We've just kept doing the same things we've always done and it feels more like hanging out with friends than trying to make something for a certain audience. We like making music that we enjoy playing and we're proud of, and hopefully other people enjoy it as well," Jackson said.

Jackson claimed they all had a separate musical instrument they were passionate about and were able to vibe with that. One of the first songs they learned was "What You Know" by Two Door Cinema Club. Since then they have continued to flourish and covered the Arctic Monkeys, as well as Arcade Fire, The Strokes, Vampire Weekend, Beirut, Neutral Milk Hotel, and some other new age popular songs. They continue their coffee house traditions by playing at local coffee spots.

Senior year they decided to buckle down and write an original album before graduation. That album is called *Midnight District*.

"The response was pretty positive. We were contacted about opening some shows. A person from a music journal site found our album and offered to review and promote it which we thought was really cool. It was surreal seeing something we made out in a real place with other people talking about it," Jackson said.

LADY IN THE SKY NICOLE FITE '18

Nicole Fite has been inspired by her dad's early passions. Her dad has been flying since he was in his 20s and who now frequently flies small Cessna planes.

"I think I started flying with my dad about when I was in middle school," Fite said. "Normally I'm not really afraid of sleeping, I fall asleep from the hum of the plane."

They typically fly over the ever-famous, beautiful Lake Tahoe and have been able to see the city of San Francisco from a whole new perspective, from uptop.

"We always go to Tahoe, I really like flying over the lake, said Fite. "It is basically my second home as well. It is really beautiful especially in the winter, we get to fly above the mountains."

The bonding she has experienced with her Dad from their time in the sky is unrivaled.

WADE ON THE WATER KELBY NARDONI '17

Waking up at 5 in the morning is something no college student wants to do, let alone every day of the week to go workout. But that is what a lot of athletes have to do. Kelby Nardoni, a leader of the Santa Clara Women's crew team, is one of these student athletes.

"Rowing teaches perseverance and not a lot of other things that students are involved in teach that kind of discipline," said Nardoni.

During her first year, Nardoni underestimated the time commitment crew required and, at first, found it difficult to balance her academics, social life and practice. A typical week for Nardoni included waking up for morning practice, sprinting to her 9:15am class, then getting ready for evening practice, which does not leave time for much else. This packed schedule entailed very little sleep and Nardoni used whatever she could to make it through the day, including food, tea, and a 20 minute nap.

"I sometimes do question being on the team, I just never regret it," Nardoni said. Despite the intense dedication to her craft, Nardoni is still able to maintain the life of a college student. "My core group of friends are my teammates because we spend every waking moment together," said Nardoni. Her close bond with her teammates extends beyond the practice, spending time with each other doing varying pastimes and a large amount of food-related activities.

Aside from her hectic work schedule, Nardoni loves how her time on crew has influenced her time at Santa Clara. "Coming on as a freshman, you don't think that you can lead a team but that was the position that my coach had envisioned for me," said Nardoni, who was selected as a team leader her first year on team. This position, in addition to being in the Bronco Leadership program, helped her become a better leader and source of inspiration for her team. This translates to other aspects of her life.

"I'm thankful to come to a school that actually cares because bigger schools would just tell their athletes that they're their to work hard and nothing else, but Santa Clara actually cares," said Nardoni. The attention given to each student really drew Nardoni to Santa Clara and was the influential factor in her college decision. During her first tour of campus, she noticed the substance within all of the students as well. "These are great people and they're not people who are just taking up space, they are going to do something with their lives, I knew I wanted to be part of this community," said Nardoni.

Nardoni's role as team leader, has helped influence her choice of major as well. Initially a Public Health major, she is now majoring in Psychology and hopes to get her masters in Industrial Organizational Psychology. For now, she will focus on her fulfilling her commitment to the team.

"I want to set a good example for all the incoming girls, that working hard and being on the team is worth it," said Nardoni.

DISNEY PRINCESS CHRISTINE FRAHER '17

Fall quarter I accomplished a dream I've had since before I could remember: working for Mickey Mouse. For one semester, I worked as a character performer in the Disney College Program at Walt Disney World. I lived right off of Disney property with hundreds of other college students, got to go into the parks whenever I wanted, and had a pool and beach volleyball court right outside my door. Oh, and the weather was always warm and sunny.

However, each of these perks had its own twist. My apartment complex was dated and unsanitary (I loved it anyway), I did not get to play in the parks as much as I would have liked because I was always working, and the bus system (I will curse you till the day I die, Transtar) was never on time and took 45-90 minutes for a 15-20 minute car ride. At the beginning of the program, before our Traditions and training for our new roles, playing volleyball until the lights went out then hanging out in the pool until it closed at 1:00am became the usual way to end the night. I made the most of my closest friends at these times.

I worked six to seven days a week, most days starting at 6:00, meaning I needed to be up at 4:30am for prep and travel, and some days even had double or triple shifts. I felt exhausted and done for the day after one or two sets or meet and greets, but some days went on for nine or twelve sets.

However, almost all the pain of the costume would disappear when I was meeting guests. I did my best to give each guest the best interaction possible and made sure no one could ever tell I was tired, in pain, practically blind or nervous. I had a family that made me cry, a guest that made me laugh, and thousands more that melted my heart. As fun as the energetic kids that I would run around set with were, my favorites were the shy ones that slowly walked up to me with their head down and mumbled their hellos. I loved kneeling and cuddling with little kids when I was especially tired—I pretty much worked as a professional Disney hugger.

It was fun going on Tower of Terror on my lunch breaks, seeing my friends at work, and watching the fireworks on any given night. I did so much and yet there was still so much I wanted to do. The end of the program left a bitter taste in my mouth because of how packed my work schedule was. But I try to remind myself that I went there for the job and that since I never again will be best of friends with Mickey, Minnie, Donald, Pooh Bear, Piglet, Phineas & Ferb, Doc McStuffins, Sofia the First, Stitch, or Abu, that working every extra minute counted. The job was hard but the memories I made not only for myself, but for the thousands of guests that came to visit these friends was worth it all.

THE ADVENTURER MAGGIE DENNIS '16

Having come from a Seattle K-12 school with only 65 other classmates, for Maggie Dennis '16 coming to Santa Clara University meant taking every opportunity she could get. From joining Kappa Alpha Theta sorority and becoming the chief financial officer her junior year, to running the occasional half-marathon, to studying abroad and taking an internship in Belgium, to finishing a Global Social Benefit Fellowship with the Miller Center, Dennis made the most of her four years here.

Despite growing up in the bustling city of Seattle, having spent her first 12 years of schooling in such a small community of people made her more than ready to see what the world had to offer her: starting with Santa Clara University. For Dennis, her first big leap was joining a study abroad program in Brussels, Belgium. Being but a short plane ride away from dozens of countries, Dennis jumped at the opportunity to explore each chance she got.

"I studied abroad in Brussels, which is super central. So I got to travel a ton - that was a highlight. I would be in a different country every weekend and be like, 'What is happening with my life right now?' It's crazy."

After switching from pre-med to an Economics major and Public Health minor, Dennis found her perfect fit with the Miller Center Fellowship. Combining her financial analytic skills and public health framework, she and her partner worked in South India to conduct a social impact assessment for a local enterprise that provided free cataract surgeries for the poor.

Spending eight weeks visiting the hospital and interviewing over 200 patients, she was able to get a feel for the people and how it all came together. It's all about connection for Dennis, as meeting with new people in India allowed her to interact with them on a deeper level.

"It was really fun hanging out with the nursing students there that are close to our age. One time we were just hanging out in the hospital, sitting on one of the beds with a bunch of the new class and showing them pictures on our phone of our families and where we live," said Dennis.

But the program provided much more than social benefits, as she was able to truly apply her learned skills and gain a peek into the world beyond college.

"Being in the fellowship really helped me figure out what I want to do, what I like, and what I'm good at. That had a huge impact on my decision to apply to grad school - and even that I wanted to go," said Dennis. She was able to find her passion for international development, as she plans to pursue it in grad school following graduation.

Her take-away from the past four years?

"Be open to opportunities and don't be afraid to do your own thing. You have so many opportunities here and there are so many different possibilities." As Maggie prepares for what the future holds, she can count on the gathered experiences and lessons from the last four years to seek out new adventures.

HEAD IN THE CLOUDS FEET ON THE GROUND HELENA ALFAJORA '16

Down to earth seems to epitomize the spirit of Helena Alfajora '16. While she stays firmly grounded in her heritage and the world she interacts with, she seems to connect with her work on a plane reserved only for the truly creative-minded. Call it her sixth sense, as Helena pursues her art, dancing, and any other endeavor, she manages to see beyond the physical and towards where her work has been and needs to go. As she approaches art, Alfajora explained, "I kind of like to think that I talk to the piece, like, 'Okay, what do you need? What do you need from me? What tools can I use to help you become what you were meant to be?' It just makes me feel so alive. You feel so connected to your body, the paper, and your pencil."

As a Studio Art and English double major, she serves as a double threat, demonstrating impressive skills in both the creative and academic realms, having won first place in an exhibition for art in her junior year and receiving an English Canterbury Fellowship her senior year. The latter, of which, has allowed her to combine her two passions.

"I had this idea of creating a story through art. It's all very grounded in mythology, especially Hawaiian mythology, and the connection that people have to nature and to the Earth. It's all coming out and I don't really realize it until I start to learn, step back, and look at things. But it's all there. It's all together," Alfajora said.

Perhaps one could even call her a triple threat, as she has performed hula dancing locally, in Hawai'i, and even in Japan. Working with a Halau hula dancing team in San Mateo (the main school being based in Kaneohe, Oahu in Hawai'i), Helena has been able to connect her love of the arts as well as the stories inherent in such a rich cultural tradition.

"I think at first it's a lot of, 'Wow, what is my body doing?' But then as you get to that stage where you can perform the moves well, it becomes, 'What is a good hula dancer?' It is someone who actually understands what you're talking about when you're dancing. Feeling that out and just feeling the history, the nature, the environment, and the story that goes into it, you understand that it's so much deeper than just a move. It's something you embody when you dance."

Even with her many pursuits, Alfajora still makes sure to adhere to her roots, constantly seeking out the deeper connections. With her mother and half-sister coming from the Philippines, she feels very in touch with that side of her as she serves as PCN director of Barkada, the Filipino club on campus.

Helena has managed to balance the delicate line of going after all that fascinates her, finding worthwhile meaning in each, and excelling at all of them. As we all pursue our passions over the course of our individual college experiences, we can only hope to find the kind of deep connection and fervor for our studies.

[FIRST YEARS]

■ Paige Mueller

Your first year provides new experiences; whether it's living with a roommate, navigating new classes, or creating new friendships, they help forge the code that will define your time as a Bronco. Excitement and curiosity are at the forefront as first years embark on this great new adventure.

[JUNIORS]

■ Lynden Kuwada

As friendships have blossomed over the past two years, juniors enjoy their final college years creating lifelong memories. Junior year is often notable for many students' abroad experiences, significant birthday nights, and search for a post-graduation direction.

[SENIORS]

■ *Claire McBride*

Four years ago, the class of 2016 began this exciting chapter. Little did they know that their learning would go beyond the classroom and shape who they would become through friendships, hardships and successes. As they look forward to life after SCU, they reflect on the experiences that defined their code as Broncos.

■ *Paige Mueller*

Family members and loved ones celebrate their seniors and their accomplishments. Take a look and enjoy some photos, past and present, from the class of 2016.

Jordan 2016

Dear Jordan,

Words cannot begin to express how incredibly proud of you we are. We admire you for the young man you have become. With your quick wit and determination we know you will succeed in anything you set your mind to achieve. Congratulations on completing the first step of your journey. We cannot wait to see where the next steps may take you!

Love Always,
Mom, Dad, and Alex

"Every great dream begins with a dreamer. Always remember, you have within you the strength, the patience, and the passion, to reach for the stars to change the world."

~Harriet Tubman

Annemarie Heavenly Mendonsa "The future doesn't lie ahead of you waiting to happen...It lies inside of you, waiting to be discovered." Love always, Mom and Dad

Danny Kenichi Avalos

Congratulations, Danny. It's been a long journey, but your consistency has paid off. We are very proud of you. You have given us a lot of joy and have been a great role model for your younger brother Koji. Thank you for helping him whenever he needs help. You have a bright future ahead of you. Keep working hard and be consistent. We are very proud of everything that you have accomplished. Love Dad, Mom and Koji.

Class of 2016

KENDALLE WEXLER

*Reach for the moon 🌙
even if you miss, you'll
land among the stars. ★
We are so proud of you!
Congratulations!*

Dear Ramsey,

You have brought joy, friendship, and laughter into our lives. Dad would be proud of your accomplishments!

Congratulations, Smiles Always, Love, Mom and Dad

Nain,

Muchas Felicidades!

Con dedicacion, esfuerzo, y trabajo logaras el exito en la vida.

Recibe nuestras bendiciones hija querida!

*Tus padres que te quieren,
y orgullosos siempre estan de ti,
Sergio y Elsa Madrigal*

Ryan, We are so proud of all you have achieved and the man you have become. With your future bright, may all your hopes and dreams comes true. Congratulations! We love you, Your Family

Emily

Congratulations! We are so proud of you and the young woman you have become. What fun it is to watch you shine!!

Love, Your Family

Mariah Chappell

Congratulations!
We are so proud of the hard work you have put in these last four years. We know that you will bring your abundant energy and joyful spirit wherever you go. We Love You So Much, Mom, Dad, Lele, Lissie, Helena, and Osito

Sarah Ann Youlton

Congratulations Sarah on your graduation in Mathematics and Engineering Physics!

We are so proud of you!

"The future belongs to those who believe in the beauty of their dreams." -Eleanor Roosevelt

Love You !!
Mom, Dad, Michelle
and Cocoa too!

CONGRATULATIONS

class of 2016

[CLOSING]

■ *Ketan Rajput*

Everyone relives their memories as the three quarters come to a close. Spring fever is in the air as students get ready for the summer, but as students look forward, they cannot forget the way activities, academics, athletics and all the other features of their year combined together to shape their experience.

A group of six students, three females and three males, are posed in two rows. The background features a building with a prominent bell tower and palm trees, suggesting a school setting. The students are dressed in casual attire. Labels with their names are placed near each individual.

ASHLEY NGUYEN // EDITOR IN CHIEF

Nine has always been one of my favorite numbers. You can be on cloud nine, dressed to the nines, adding the numbers on Peyton Manning's jersey would give you nine... the number has always seemed lucky to me. It was only appropriate that I would conclude my yearbook experience after nine years of being on a staff, and as Editor-in-Chief.

I'm grateful for the Chipotle and Benihana's. I'm grateful for having the opportunity to kayak in Monterey Bay and jump 75 feet out of a tree into open air with nothing but a rope to catch me. I'm grateful for our office, which I spent too much time in. I am extremely grateful to have attended the 50th Annual Golden Circle Theater Party where Tony Bennett performed and we danced the night away. But above all of the food and the retreats, I am most grateful for all the people I have met and the friendships I have made because of The Redwood. Whether I interviewed them freshman year or they came along with me on this crazy ride, I know I have made lifelong friends to whom I owe a lot.

To my editors and staff, thank you for all of your work making this vision come to life. Without your innovative design, stunning photography and captivating copy, we would not have as incredible of a book as the one you hold on your hands, print or digital. Thank you for making me laugh and for supporting me in one of my most challenging and fulfilling endeavors. I am humbled by the talent each of you possess and wish nothing but the best for the remainder of your time at SCU and onward. Remember me every time you look at the decal on the wall... because it was really hard to put up and I'm proud of it!

To all of the CSO leaders, congratulations on all of your accomplishments. I am honored to have worked with each of you. I know I speak for a lot of us when I say that at times our roles demanded more than we thought we could handle, but our experiences were 100% worth it.

Lastly, to whoever is reading this, I hope that as you flip through these pages they bring memories from a place we all called home. Cherish them.

As I say goodbye to my four years, I look back with nothing but reverence. I will deeply miss our campus and proximity to everything we love, and especially my friends. But most of all, I will miss The Redwood. Thank you for an incredible four years and Go Broncos.

[NECTARINE]

VIVIAN STONEKING // MANAGING EDITOR

There are so many best parts of being on staff this year!

After retreat, it was untangling my hair and rewatching my iFly video. On staff deadline days, it's getting a workout by carrying huge boxes back from Pizza My Heart. During editors' meetings, it's napping on the Redwood couch between spreads, which has happened every single deadline. I have really enjoyed getting to know my fellow editors and navigating a new staff with its unique challenges. Being on the staff in this position has pushed me to grow as a leader, and free dinner at CSO training has also been an extra plus!

[LYCHEE]

[MEET THE STAFF]

and their spirit fruits

AVA JENSEN // PERSONALITIES EDITOR

Honestly, I'm just here for the free desserts and the profile picture taken at the end of the year.
[AVOCADO]

SAUL VARGAS // DIGITAL PUBLISHING EDITOR

The connections you make in a creative team like the Redwood can help you out later in unexpected ways.
[MANGO]

CIARAN FREEMAN // DESIGN EDITOR

Moving into an editor position has been a really gratifying experience for me. I have really loved collaborating with all of the creative people that we have on staff this year.
[ORANGE]

CLAIRE MCBRIDE // PHOTO EDITOR

My favorite thing about being on yearbook staff this year was having the opportunity to connect with so many different campus organizations and leaders.
[MANGO]

ANEKA KHILNANI // COPY EDITOR

The best part of being on staff is the friendliness. It's been a pleasure getting to know everyone. Working together to create an amazing book is only possible with the endless hours of work and dedication from each and every person on staff.
[MANGO]

EMMA CHEN // DESIGNER

The little moments spent amongst the staff were my favorite. You learn things about each other and what you're doing that I would have never otherwise. Things like how to strategically crop out people from photos, to what someone's chipotle order is, and that apparently I am great at stacking ping pong balls and cops.
[PEACH]

BERNICE WANG // DESIGNER

Watching new staff members discover that some of our chairs lean too far back.
[PEACH]

ROBERT SCHULTE // DESIGNER

The best part about being on staff is being able to learn about Santa Clara while creating an awesome book with great people. I've also come to appreciate the work everyone does as well as Adobe Creative Cloud. The food and learning other staffers' spirit fruit is just a bonus.
[POMEGRANATE]

ANGELINA POOLE // COPYWRITER

I really liked interviewing students who were involved in different sports and clubs. They all offered great quotes and articulate responses. I enjoyed learning and having meaningful conversations. A lot of my interviews lasted well over 20 minutes just because of how easy it was to talk with them.
[BANANA]

ALEXIS TONG // PHOTOGRAPHER

The hour-long meeting for each deadline is probably my favorite part of working on the Redwood. Some may think these meetings are stressful, but to me these meetings are like checkpoints. It's rewarding to visually see our progress on the yearbook. Also, we get Pizza My Heart.
[CHERRY]

KETAN RAJPUT // PHOTOGRAPHER

It was a wonderful year working with a talented bunch of people. Being on the staff gave me an opportunity to reach out and interview people, which I had never done before. The indoor skydiving and team building activities at staff retreat were super fun. The best part being on staff was getting an all-access pass for the Misterwives concert!
[LYCHEE]

ALI ROMLEY // DESIGNER
The best part of being on staff has been the free pizza at deadlines...and getting to do what I love with some pretty awesome people.
[MANGO]

KIRKLAND LANDBERG // MULTIMEDIA MANAGER
Besides getting to work with a great group of friends and going indoor skydiving together (which is much harder than it looks), I've loved being able to apply my passion and career as a filmmaker to a platform that is not usually seen as film friendly. Adding in a film element to the digital yearbook really changes the way we capture memories of our years at Santa Clara and I've loved being a part of that process!
[STAR FRUIT]

ANDREW GODFREY // BUSINESS MANAGER
Round two on the Redwood has been one for the books. I've loved having the opportunity to help manage the organization from a business perspective while getting to know the rest of the staff. I'll miss everything from the budget meetings to the all you can eat Pizza My Heart buffets at the end of each quarter. Couldn't have asked for a better two years on staff!
[GUAVA]

NEIL BRORSEN // PHOTOGRAPHER
My favorite thing about being on staff is that it pushes me to meet and bond with individuals from other social groups that I would not usually have the opportunity to meet. It helps to broaden my perspective of the community that I call home.
[APPLE]

DANIEL WEBBER // PHOTOGRAPHER
Seeing all of my hard work paying off to make a awesome page, but being Princess of the week is a close second.
[RASPBERRY]

LOUISE LI // DIGITAL PUBLISHER
The Redwood is really an amazing experience. The best part of being on staff is the overwhelming team spirit. Everyone is collaborative and willing to help each other, and the regular meetings are as relaxing as chatting with friends.
[MANGO]

COLOPHON

The 2016 Santa Clara Redwood yearbook, volume 112, was produced by the yearbook staff at Santa Clara University in Santa Clara, California and was printed by Walsworth Yearbook Publishing Company in Marceline, Missouri.

The account was serviced locally by Kelly Parsons and Nicole Gravlin, Walsworth Yearbook Sales Representatives and at the publishing plant by Kathy McCollum, Walsworth Customer Service Rep.

The cover was designed by Ciaran Freeman, and Ashley Nguyen and is printed on a premium silver luminaire linen, with clear, white and steel silkscreen and debossing applications. The cover is on 160pt. binders board. The endsheets are on Walsworth standard white matte endleaf stock.

The book's 240 pages are printed on 100 pound, matte, FSC - certified paper stock. The 112th volume includes 240 pages in full color. The fonts used in the book were as follows: Century Gothic, Minion Pro, and Fira Sans.

Layouts were submitted to the plant as pdf files uploaded online via company plugins. The Redwood was produced using Adobe InDesign CS6, on iMac and Mac Pro computers.

All photographs were post processed with Adobe Photoshop CS6 and Adobe Camera Raw 7.

Senior Portraits were taken by:
Ultimate Exposures
7011 Hayvenhurst Ave # C
Van Nuys, CA 91406

The Redwood was published for all undergraduate students at Santa Clara University for \$120. Our coverage ranges from September 2014 to March 2015.

Special thanks to our advisor, Gordon Young, and to Kelly Parsons and Nicole Gravlin for managing our senior congratulatory ads, mailers, and book sales.

If you would like more information about our publication, please contact us at:
